

Fiscal Estimate Narratives

DOR 1/31/2012

LRB Number	11-3196/1	Introduction Number	AB-0489	Estimate Type	Original
Description Financial assistance for the livestock premises registration program, a tax credit for livestock identification tags and tag-reading equipment, and making an appropriation					

Assumptions Used in Arriving at Fiscal Estimate

The bill creates a non-refundable income and franchise tax credit equal to 25% of the amount that a taxpayer paid in the taxable year for radio frequency identification tags for the taxpayer's livestock located in this state and 25% of the amount that a taxpayer paid in the taxable year for equipment used in this state to read radio frequency identification tags on livestock. Unused credit amounts may be carried forward for 15 years.

Fiscal Estimate

Based on information provided by the Wisconsin Livestock Identification Consortium, it is assumed that approximately 300,00 eligible tags would be purchased in 2012, with the number rising to approximately 455,000 by 2016, and that the tags would be purchased at an average cost of \$2.50 per tag. In addition, it is assumed that approximately 1,700 tag readers will be purchased in 2012, with the number of readers purchased increasing to approximately 3,000 in 2016, and that the readers would be purchased at an average cost of \$1,000 each. Based on this, the bill would result in a reduction in revenue of an estimated \$155,000 in FY 2012, \$635,000 in FY 2013, \$720,000 in FY 2014, \$820,000 in FY 2015, and \$950,000 in FY 2016.

The fiscal effect would be reduced to the extent that other tax credits, including the Dairy and Livestock Farm Investment Credit, the Beginning Farmer and Farm Asset Credit, and the Qualified Production Activities Income Credit, reduce the tax liability of claimants of the credit created in the bill.

Long-Range Fiscal Implications
