Description										
Listing frac sand mining as a conditional or prohibited use in certain types of zoning ordinances										

Assumptions Used in Arriving at Fiscal Estimate

Under current law, cities, villages, counties, and towns with village powers are authorized to regulate certain facets of land use through zoning ordinances.

Under the bill, a zoning ordinance that is enacted that pertains to agricultural use must list frac sand mining as a conditional use. In addition, a zoning ordinance that is enacted that pertains to residential use must list frac sand mining as a prohibited use.

The bill may require certain governmental entities that have enacted zoning ordinances to incur one-time costs to amend their ordinances to comply with the new law. The Department of Revenue (DOR) does not have information which would permit it to reasonably estimate the amount of these one-time costs.

Long-Range Fiscal Implications
