Data from those health care providers may be obtained through sampling techniques in lieu of collection of data on all patient encounters and data collection procedures shall minimize unnecessary duplication and administrative burdens. If the department collects from health care plans data that is specific to health care providers other than hospitals and ambulatory surgery centers, the department shall attempt to avoid collecting the same data from those health care providers.

(2r) shall provide orientation and training to insurers and administrators that submit data under this subchapter, to explain the process of data collection and analysis and the procedures for data verification, comment, interpretation, and release. If s. 153.455 (4) applies, the department may perform or contract for the performance of the duties specified for the data organization under this paragraph.

(12) (a) Subject to s. 153.455, the department shall, to the extent possible and upon request, assist members of the public in interpreting data in health care information disseminated by the department.

(b) The entity under contract under sub. (2m) (a) shall, to the extent possible and upon request, assist members of the public in interpreting data in health care information disseminated by the entity.

If the secretaries terminate the contract, they shall recommend to the department of administration that that department use a competitive request-for-proposal process to solicit offers from other organizations for performance of the services required of the data organization under the terminated contract.
