### *Analysis by the Legislative Reference Bureau*

Under current law, as created in the 2011 Biennial Budget Act (Act 32), a county is generally prohibited from using its own workforce to perform a highway improvement project on a highway under the jurisdiction of another county or a municipality that is located in a different county. A city with a population of 5,000 or more is prohibited from having a highway improvement project performed by a county workforce unless the project is under, and meets the requirements of, the local roads improvement program. Also under current law, as created in Act 32, a city, village, town, or county may not use its own workforce to perform a construction project for which a private person is financially responsible. This bill eliminates these prohibitions.

For further information see the *local* fiscal estimate, which will be printed as an appendix to this bill.
