Fiscal Estimate Narratives DWD 10/10/2013

LRB Number 13-3020/1	Introduction Number	SB-336	Estimate Type	Original			
Description							
Local youth apprenticeship grants and making an appropriation							

Assumptions Used in Arriving at Fiscal Estimate

Under current law, \$1,773,700 is appropriated to the Department of Workforce Development (DWD) in each of fiscal years 2013–14 and 2014–15 for local youth apprenticeship grants to local partnerships consisting of one or more school districts, other public agencies, nonprofit organizations, individuals, and other persons for the implementation and coordination of local youth apprenticeship programs. This bill increases the amounts appropriated to DWD for those grants by \$500,000 in each of fiscal years 2013–14 and 2014–15.

Created by statute in 1991 Wisconsin's Youth Apprenticeship (YA) work-based learning program is a nationally recognized program which provides high school juniors and seniors with integrated academic and occupational skills leading to both a high school diploma and a State Skill Certificate in a specific industry

Under the bill, DWD anticipates minimal changes in administrative operations of the program. In SFY13, the program received over \$500,000 in additional grant requests that were denied due to a lack of funding. With the additional \$500,000 in funding, DWD's youth apprenticeship program would serve an additional 555 participants each year.

The current Youth Apprenticeship IT database is antiquated and in MS Access 2003. As such it is only available for internal DWD staff to access and does not provide the capacity for robust data warehousing, retrieval, or analysis. Significant long-term efficiencies in staff time and program development can be gained with a commitment to allocate resources for an upgrade to the IT database system. Examples of such efficiencies include: the elimination of emailed or USPS mailed Word documents, which require manual handling, improved error detection and correction processes, and data tracking and long-term analysis capacity.

The one-time cost for IT systems modifications that will provide the above mentioned program efficiencies and more fluid and accurate data manipulation is estimated at \$38,500.

Long-Range Fiscal Implications

With the additional \$500,000 in annual funding, DWD's youth apprenticeship program would serve an additional 555 participants each year.
