

Fiscal Estimate Narratives

PSC 11/22/2013

LRB Number 13-2954/2	Introduction Number AB-0513	Estimate Type Original
Description Dry cask storage of spent fuel from nuclear power plants and granting rule-making authority		

Assumptions Used in Arriving at Fiscal Estimate

AB-0513 would have no fiscal effect on the PSC, as the rule-making activities -- both one-time and regularly scheduled -- assigned to the Commission could be absorbed by current staff. The effect on local government is a potential increase in revenues due to the proposed annual fee of \$250,000 for dry cask storage from the utility or person storing spent nuclear fuel within the affected village, town or city boundaries, as well as an additional, annual fee of \$5,000 for each cask stored. Each affected county would receive \$150,000 a year for dry cask storage within their designated boundaries.

Long-Range Fiscal Implications

see assumptions above.
