2 (1) (intro.); and to create 609.837 and 632.867 of the statutes; relating to:

Analysis by the Legislative Reference Bureau

This bill prohibits health insurance policies, and self-insured governmental and school district health plans, that cover injected or intravenous and oral chemotherapy from requiring the insured to pay a higher copayment, deductible, or coinsurance for oral chemotherapy than is required for injected or intravenous chemotherapy, regardless of the formulation or benefit category determination by the policy or plan. A health insurance policy or self-insured governmental or school district health plan may not comply with that prohibition by increasing the copayment, deductible, or coinsurance for intravenous or injected chemotherapy that is covered under the policy or plan.

The requirements of the bill apply to individual and group health insurance policies, including limited service health organizations, preferred provider plans, defined network plans, and cooperative associations’ health care plans; to health care plans, including a self-insured plan, offered by the state to its employees; and to self-insured health plans of a city, town, village, county, or school district.
For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
