February 17, 2014 – Introduced by Senators VINEHOUT and LASSA, cosponsored by Representatives BERCEAU and T. LARSON. Referred to Committee on Health and Human Services.

1 AN ACT to create 961.41 (3h) of the statutes; relating to: misuse of a prescribed controlled substance and providing a penalty.

Analysis by the Legislative Reference Bureau

Under current law, a drug, or controlled substance, is classified into one of five separate schedules. The classification is based on: 1) whether there is a currently accepted medical use for the drug; 2) the drug's potential for being abused; and 3) the nature of the psychological or physical dependence that use of the drug may produce. Controlled substances that have a high potential for abuse and no currently accepted medical use are included in schedule I. Controlled substances that have an accepted medical use and that have the lowest potential for abuse and produce the least dependence when compared with other controlled substances are included in schedule V. Under current law, a schedule II, III, or IV controlled substance may be dispensed, but only with a prescription.

This bill prohibits a person from intentionally using a schedule II controlled substance that is prescribed to him or her for oral ingestion in a manner that is inconsistent with the prescribed usage. Under the bill, a person who does so is guilty of a Class I felony and subject to a fine not to exceed $10,000, imprisonment not to exceed three years and six months, or both.

Because this bill creates a new crime or revises a penalty for an existing crime, the Joint Review Committee on Criminal Penalties may be requested to prepare a
report concerning the proposed penalty and the costs or savings that are likely to result if the bill is enacted.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

SECTION 1. 961.41 (3h) of the statutes is created to read:

961.41 (3h) MISUSE OF PRESCRIBED SCHEDULE II NARCOTIC DRUG. A person who obtains, pursuant to a valid prescription or order, a controlled substance included in schedule II that is a narcotic drug and that is prescribed to be ingested orally may not intentionally ingest or consume the substance in another manner. A person who violates this subsection is guilty of a Class I felony.
