

DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU

LRB-3428/P1dn
ZDW:cjs

October 21, 2015

ATTN: Jake Curtis

In discussing this draft, the movement of moneys was framed as “swapping” money between federal and state appropriations. As federal and state moneys cannot be comingled, this draft requires DOT to transfer moneys from federal and state appropriations to appropriations of the same type. Please review the language requiring those transfers carefully to ensure that the total moneys transferred are consistent with your intent.

This draft creates an appropriation, s. 20.395 (2) (fq), to receive all transfers of state funds required by this draft. The language setting out the purpose of the appropriation mirrors the language of the companion federal appropriation, s. 20.395 (2) (fx), and the state appropriation under s. 20.395 (2) (eq). Please review that language to ensure that it is consistent with your intent.

Let me know if you have any questions or require changes to the draft.
