Description							
Providing an itemized statement of sales to customers in this state for sales and use tax purposes and							
making an appropriation							

Assumptions Used in Arriving at Fiscal Estimate

Under current law, sellers with a sufficient business connection (or "nexus") with the state are required to collect and remit sales tax. Nexus is generally established by one of two means: 1) the seller has a physical presence in Wisconsin or 2) the seller has a related affiliate in this state and the affiliate uses facilities or employees in this state to advertise, promote, or facilitate sales on behalf of the seller. When sellers do not collect and remit sales tax, customers are liable for use tax on such purchases. The Wisconsin individual income tax return provides a line for taxpayers to report their use tax liabilities.

The bill would require remote sellers that make sales of tangible personal property and taxable services in excess of \$50,000 in a year to provide either an itemized annual sales statement to each customer in Wisconsin or provide the Department of Revenue with a summary of the remote seller's sales into the state. The bill would also allow the department to impose a fee on each seller who is required to comply with the new provisions to cover the cost of administration.

For tax year 2014, use tax reported on Wisconsin individual income tax returns is estimated to be \$3.6 million. Assuming use tax collections remain flat, tax year 2016 individual use tax collections will be \$3.6 million. Assuming the proposed reporting requirements increase Wisconsin use tax compliance by 10%, collections would increase by approximately \$360,000 in 2016.

County and stadium district sales tax collections were 8.2% of state collections in FY15. Assuming this percentage does not change, county and stadium taxes would increase by \$30,000 in 2016.

Administrative costs incurred by the department could be covered by the fee allowed under the bill.

Long-Range Fiscal Implications
