Fiscal Estimate Narratives

DOR 2/8/2016

LRB Number	15-2891/1	Introduction Number	SB-693	Estimate Type	Original
Description					
Income and franchise tax credit for investments in a community development financial institution					

Assumptions Used in Arriving at Fiscal Estimate

Under this bill, individuals may claim a credit for a qualified investment in a registered community development financial institution (CDFI). The nonrefundable credit is equal to 10% of the qualified investment if the investment is at least \$10,000 but not more than \$150,000, or 12% if the investment is more than \$150,000, but not more than \$500,000. If a person withdraws the investment from the CDFI before the end of a 5-year investment period and does not reinvest in another CDFI, the person must repay a portion of the credit amount, depending on when withdrawn.

Partnerships, limited liability companies, and tax-option corporations may not claim the credit but the eligibility for, and the amount of, the credit are based on their payment of amounts. Partners, members of limited liability companies, and shareholders of tax-option corporations may claim the credit in proportion to their ownership interests.

The credit is available for taxable years beginning after December 31, 2014, and before January 1, 2017. Unused credit may be carried forward and offset against tax for up to 15 years.

DOR does not have the necessary data to determine how many individuals or entities currently invest or would be incentivized to invest in a CDFI under this bill. As such, the fiscal impact of the bill is unknown.

However, as a comparison, the federal government provides the new markets tax credit for making qualified equity investments in certain community development entities. The credit amount is equal to 39% of the investment awarded over seven years. Based on the most recent data available from the IRS and the CDFI Coalition, there were approximately \$1.46 billion in new markets tax credits awarded in 2012 and Wisconsin has historically accounted for about 4% of new markets tax credits. If the amount of qualified investments under this bill are comparable to those under the new markets tax credit, after adjusting for the credit rates, the Wisconsin credit amount would be approximately \$16.4 million annually. To the extent that more (fewer) investments qualify for Wisconsin purposes, the fiscal effect would be larger (smaller).

Long-Range Fiscal Implications
