ASSEMBLY BILL 113

- 1 of husbandry and agricultural commercial motor vehicles on highways and
2 transporting implements of husbandry by trailer on highways.
-

Analysis by the Legislative Reference Bureau

Current law includes various provisions relating to the operation on highways of implements of husbandry and agricultural commercial motor vehicles (agricultural CMVs). An implement of husbandry is a self-propelled or towed vehicle that is manufactured, designed, or reconstructed to be used and that is exclusively used in the conduct of agricultural operations. An implement of husbandry may include a farm tractor or a towed vehicle such as a farm trailer or manure trailer. An implement of husbandry may also include such farm equipment as a self-propelled combine; a self-propelled forage harvester; self-propelled fertilizer or pesticide application equipment (but not including manure application equipment); a power unit towing tillage, planting, or cultivation equipment; or another self-propelled vehicle that directly engages in harvesting farm products, directly applies fertilizer, spray, or seeds (but not manure), or distributes feed to livestock (hereafter "farm equipment"). An implement of husbandry may also be a combination of vehicles in which each vehicle in the combination is an implement of husbandry or in which a towed implement of husbandry, such as a farm trailer, is towed by a farm truck, farm truck tractor, or motor truck. An agricultural CMV is a commercial motor vehicle that: 1) is substantially designed or equipped, or materially altered from its original construction, for the purpose of agricultural use; 2) was designed and manufactured primarily for highway use and, with an exception, was manufactured to meet federal motor vehicle highway safety standards; 3) is used exclusively in the conduct of agricultural operations; and 4) is directly engaged in harvesting farm products, directly applies fertilizer, spray, or seeds to a farm field, or distributes feed to livestock. An agricultural CMV is not an implement of husbandry.

This bill makes changes to the definitions of implement of husbandry and agricultural CMV. Under the bill, a combination of vehicles is an implement of husbandry if the combination consists of any implement of husbandry towed by a farm truck, farm truck tractor, or motor truck. The bill also specifies that a power unit towing harvesting equipment is an implement of husbandry of the farm equipment type and that a grain cart is an implement of husbandry of the same type as a farm trailer. The bill clarifies that, if an implement of husbandry consists of a power unit towing tillage, planting, harvesting, or cultivation equipment, the power unit may be a farm tractor. The bill also specifies that a vehicle directly applying lime to a farm field may be an agricultural CMV. Under the bill, an agricultural CMV includes a vehicle assisting a harvesting vehicle by receiving farm products as they are harvested and includes a vehicle off-loading manure when field conditions do not permit manure application directly to the field.

Under current law, no person may operate on a highway any vehicle or combination of vehicles that exceeds certain statutory size or weight limits unless

ASSEMBLY BILL 113

the person obtains a permit issued by the Department of Transportation (DOT) or a local highway authority or unless an exception applies. Statutory restrictions on vehicle size and weight generally apply to the vehicle as loaded. The general statutory weight limits on vehicles and vehicle combinations operated on a highway include weight limits per wheel, axle, and group of axles (based on the number and spacing of axles). DOT and local highway authorities may also impose, by posting highway signs on weakened highways, special weight limits that are less than the general statutory weight limits. In addition, local authorities may designate highways under their jurisdiction as class "B" highways, which results, with exceptions, in the maximum permissible weight for vehicles on these highways being reduced to 60 percent of the otherwise applicable statutory weight.

Under current law, increased statutory per-axle and per-axle group weight limits for implements of husbandry and agricultural CMVs are approximately 15 percent higher than the general statutory weight limits. However, an implement of husbandry or agricultural CMV operated on a highway may not, without a permit, have a gross weight of more than 92,000 pounds, subject to limited exceptions. The increased weight allowance for implements of husbandry and agricultural CMVs, and the gross weight limit of 92,000 pounds, expires on January 1, 2020, at which time the general statutory weight limits again apply to implements of husbandry and agricultural CMVs.

Under current law, there are additional weight limit exceptions applicable to implements of husbandry and agricultural CMVs operated on a highway, which also expire on January 1, 2020. For example, there is no weight limit per wheel, axle, or group of axles for any of the following implements of husbandry: 1) an empty potato harvester if certain conditions are met; 2) farm equipment traveling between fields, or between a farm and a field, on the highway for a distance of 0.5 miles or less; or 3) farm equipment operated on a highway under the jurisdiction of a county or municipality, unless the county or municipality has adopted an ordinance designating statutory weight limits for the highway. A potato harvester identified in item 1), above, and farm equipment identified in item 3), above, is subject to the gross weight limit of 92,000 pounds, but farm equipment identified in item 2), above, is not. These implements of husbandry identified in items 1) to 3), above, are subject to posted special weight limits but are not subject to a reduction of permissible weight on class "B" highways. In addition, there is no weight limit per wheel, axle, or group of axles, and no gross weight limit, for an implement of husbandry or agricultural CMV being operated or transported by an implement dealer or farmer for repair, servicing, or delivery if certain conditions are met, but these vehicles are subject to posted special weight limits. If a county or municipality has adopted an ordinance designating statutory weight limits for farm equipment as provided in item 3), above, the ordinance must be valid for at least one calendar year and must be adopted on or before January 15 of the calendar year in which it takes effect. The county or municipality must also forward to DOT a copy of the ordinance and DOT must publish it on DOT's Internet site.

This bill provides that the additional weight limit exceptions identified in items 2) and 3), above, also apply to an agricultural CMV except when being used to apply

ASSEMBLY BILL 113

or offload manure or assist a harvester. The bill expands the increased weight limit for implements of husbandry and agricultural CMVs operated on a highway to also apply to two-vehicle combinations transporting by trailer or semitrailer an implement of husbandry or agricultural CMV from farm to field, from field to field, or from farm to farm. Subject to the exceptions discussed below, the 92,000 pound gross weight limit also applies to these two-vehicle combinations transporting implements of husbandry or agricultural CMVs, and this increased weight allowance also expires on January 1, 2020. The bill further provides that the additional weight limit exceptions identified in items 1) to 3), above, also apply to a two-vehicle combination transporting by trailer or semitrailer such an implement of husbandry or agricultural CMV (with respect to items 2) and 3)) from farm to field, from field to field, or from farm to farm. Under the bill, an ordinance designating statutory weight limits for farm equipment as provided in item 3), above, and any amendment to such an ordinance, must be adopted on or before November 30 of the year before the ordinance or amendment takes effect and must be forwarded to DOT no later than January 20 of the year it takes effect. The bill also removes a limitation under current law that provisions applicable to potato harvesters apply only if the potato harvester is a self-propelled vehicle.

Under current law, a “maintaining authority” of a highway may issue a “no-fee permit” authorizing operation on the highway of implements of husbandry and agricultural CMVs that exceed statutory weight limits. These permits may be issued, and remain valid, only until January 1, 2020. Current law defines a “maintaining authority” of a highway as: 1) DOT or its designee, with respect to a state trunk highway; or 2) the municipality or county responsible for maintenance of the highway or its designee (local authority), with respect to a highway that is not a state trunk highway. An application for a no-fee permit must be accompanied by a listing or map of the highways that may potentially be traveled under authorization of the permit. With limited exceptions, information in the permit application must be kept confidential. If a no-fee permit is issued, upon application, the no-fee permit may be amended by the maintaining authority to reflect changes in the applicant’s circumstances, including a change in the highways to be traveled. If a maintaining authority denies an application for a no-fee permit, it must notify the applicant in writing of the denial and the notice must include a reasonable and structurally based explanation of the denial that relates to the preservation of the roadway. If the application is made with respect to farm equipment and the only basis to deny the application is the listing or map of highways accompanying the application, the maintaining authority must modify the application to include an approved alternate route or map of highways for operation of the farm equipment and approve the application. This approved alternate route or map of highways may include highways that are not under the jurisdiction of the maintaining authority issuing the permit only upon prior approval of the maintaining authority having jurisdiction over those highways. If a no-fee permit application is denied, the applicant has a right to administrative review of the decision.

This bill allows a no-fee permit to be issued for a two-vehicle combination transporting by trailer or semitrailer an implement of husbandry or agricultural

ASSEMBLY BILL 113

CMV from farm to field, from field to field, or from farm to farm. In addition, for purposes of permit issuance, the bill treats agricultural CMVs in a manner similar to farm equipment. The bill also specifies that a vehicle or vehicle combination operating under a no-fee permit on a highway under the jurisdiction of the maintaining authority that issued the permit may cross any intersecting highway. Under the bill, a municipality is not subject to open meetings requirements in making its initial determination on an application for a no-fee permit. The bill further requires a local authority, in a meeting to review the denial of a no-fee permit application, to deliberate or conduct any proceeding related to the review in closed session, with the permit applicant present for any evidentiary hearing or argument. The local authority must keep confidential all information provided by the permit applicant during the proceeding, but this information may be included in the written decision and may be disclosed in any court proceeding for judicial review of the decision.

Under current law, a county or municipality may, by ordinance, authorize operation of implements of husbandry and agricultural CMVs exceeding statutory length or weight limitations on any or all highways under the county's or municipality's jurisdiction. The ordinance serves as a no-fee permit. The ordinance must be valid for at least one calendar year and must be adopted on or before January 15 of the calendar year in which it takes effect. The county or municipality must also forward to DOT a copy of the ordinance and DOT must publish it on DOT's Internet site. Under the bill, the ordinance, and any amendment to the ordinance, must be adopted on or before November 30 of the year before the ordinance or amendment takes effect and must be forwarded to DOT no later than January 20 of the year it takes effect.

Under current law, unless an exception applies, a person may not, without a permit, operate on a highway any vehicle having a total width in excess of 8 feet 6 inches. However, there is generally no width limitation for implements of husbandry operated on a highway, although certain wide implements of husbandry are subject to lighting and marking requirements. There is also no width limitation if the implement of husbandry is being operated or transported by an implement dealer or farmer for repair, servicing, or delivery and certain conditions are met.

Under this bill, there is no width limitation for implements of husbandry being transported by trailer or semitrailer on a highway from farm to field, from field to field, or from farm to farm, at times other than hours of darkness, although certain wide implements of husbandry are subject to lighting and marking requirements.

Under current law, unless an exception applies, a person may not, without a permit, operate on a highway any single vehicle with an overall length in excess of 45 feet or any combination of two vehicles with an overall length in excess of 70 feet. Under one exception, an implement of husbandry operated on a highway without a permit may not exceed 60 feet in length if the implement of husbandry is a single vehicle or 100 feet in length if the implement of husbandry is a two-vehicle combination. These same length limits also apply if the implement of husbandry is being operated or transported by an implement dealer or farmer for repair, servicing, or delivery and certain conditions are met.

ASSEMBLY BILL 113

Under this bill, these same length limits also apply to an implement of husbandry being transported by trailer or semitrailer on a highway from farm to field, from field to field, or from farm to farm. The bill also provides for an overall length limit of 100 feet for a two-vehicle combination transporting by trailer or semitrailer an implement of husbandry from farm to field, from field to field, or from farm to farm.

Under current law, unless an exception applies, a person may not, without a permit, operate on a highway any vehicle having an overall height in excess of 13.5 feet. Under one exception, there is no height limit for an implement of husbandry. However, with an exception, the operator of the implement of husbandry is responsible for ensuring that there is adequate height clearance between the implement of husbandry and overhead structures or obstructions.

Under this bill, there is no height limit for a two-vehicle combination transporting by trailer or semitrailer an implement of husbandry from farm to field, from field to field, or from farm to farm, but the operator of the two-vehicle combination is, with an exception, responsible for ensuring that there is adequate height clearance between the implement of husbandry being transported and any overhead structure or obstruction.

Under current law, vehicle equipment requirements do not apply to implements of husbandry unless application is expressly specified by statute. Current law prohibits a person from operating on a highway any vehicle, including an implement of husbandry, that has on the periphery of its tires any flange, cleat, or other protuberance of any material other than rubber that projects beyond the tread of the traction surface of the tire, except that implements of husbandry may be operated with metal tires or tires having protuberances that will not injure the highway.

This bill specifies that an implement of husbandry having rubber tracks or tracks made of equivalent material may be operated on a highway if it will not injure the highway.

Under current law, if any bill introduced in either house of the legislature directly or indirectly establishes an exception to vehicle weight limits, DOT must prepare a report, containing specified information, relating to the bill within six weeks after the bill is introduced and before any vote is taken on the bill.

This bill directs DOT not to prepare such a report on this bill.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
