Analysis by the Legislative Reference Bureau

Under current law the Employee Trust Fund Board (ETF board) administers the Wisconsin Retirement System (WRS) under which public employees who are covered under the WRS and their employers pay contributions to the WRS and the WRS, from those contributions and the earnings on those contributions, provides retirement annuities to those public employees.

This bill creates a Wisconsin Private Retirement Security Board (board) and requires the board to establish a private retirement security plan (plan) to provide retirement benefits for residents of this state who choose to participate in the plan. Specifically, the bill requires the board to do all of the following:

1. Conduct a study to determine the feasibility of establishing a plan. The feasibility study must estimate the potential population that is likely to choose to participate in the plan and the potential cost of implementing the plan and must recommend a design and structure for the plan that is most reasonable in light of that potential population and cost.

2. Hold public hearings to receive testimony relating to the feasibility study and the recommended design and structure of the plan. The board must hold not less than five public hearings and must hold those hearings over a period of not more than
three months. The board may hold no more than one public hearing in Madison and must ensure that at least one public hearing is held in each geographic area of the state, including the southeastern part of the state, the western part of the state, the northern part of the state, and the northeastern part of the state.

3. Based on the feasibility study, the recommended design and structure of the plan, and the testimony received at the public hearings, design the plan. The board must design the plan so that, to the greatest extent possible, the design and structure of the plan are reasonably commensurate with the design and structure of the WRS. In designing the plan, the board must provide for the State of Wisconsin Investment Board to assist the board in managing and investing the assets of the fund and the assets of the accounts of participants in the plan and must provide for the ETF board to assist the board in administering the plan.

4. By no later than the first day of the 18th month beginning after the effective date of the bill, submit a report to the legislature, the governor, and the members of the Joint Committee on Finance (JCF) summarizing the conclusions of the feasibility study, the testimony received at the public hearings, and the design of the plan. The report must also include an estimate of the cost of initial establishment and administration of the plan, an estimate of the amount of time necessary to make the plan viable, and a recommendation for any legislation that is necessary to implement the plan. On enactment of that legislation, the board must implement the plan in accordance with that legislation.

In addition, the bill requires the Department of Employee Trust Funds to: 1) provide staff and other resources to assist the board in the performance of the board’s duties under the bill; and 2) submit an estimate to JCF for supplemental funds from the general fund to be credited to the general purpose revenue (GPR) appropriation of the board created under the bill. The estimate must include the initial cost of establishing the board, conducting the feasibility study, holding the public hearings, designing the plan, and preparing and submitting the report. JCF must, from its GPR general program supplementation appropriation, supplement the GPR appropriation of the board in an amount equal to the estimate.

Finally, the bill permits the board to charge reasonable fees to participants in the plan to cover the costs of administering the plan, to recover the investment costs of the accounts of those participants, and to repay the general fund for amounts provided to the board for the costs of conducting the feasibility study, holding the public hearings, designing the plan, and preparing and submitting the report and for the costs of the initial establishment and administration of the plan.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
