# Fiscal Estimate Narratives DNR 1/8/2018

LRB Number	17-4410/1	Introduction Number	AB-0547	Estimate Type	Original		
Description							
permitting and mitigation requirements for nonfederal and artificial wetlands and state assumption of the							
federal regulatory program governing the discharge of dredged or fill material into navigable waters							

# Assumptions Used in Arriving at Fiscal Estimate

The bill exempts nonfederal and artificial wetlands from certain DNR wetland permitting requirements and, if the EPA delegates to the state the authority to administer its own permit program for the discharge of dredge or fill material into navigable waters, authorizes DNR to assume that authority.

In addition, the bill requires DNR to expend all moneys received prior to the effective date of the bill for the in lieu fee subprogram no later than June 30, 2019, and, effective January 7, 2019, to expend moneys received for the in lieu fee subprogram within 24 months of being credited the moneys. No later than the third month of each legislative session, the DNR would also be required to provide a report to the governor and legislature explaining how the department expended the moneys and, if necessary, why the department failed to expend all of the moneys.

## Fiscal Effect

#### A. Revenues

In order to estimate the fee loss from wetland permits, it is assumed that 20% of those permits would no longer be issued because the projects would take place in non-federal/isolated wetlands. This assumption is based on 1990 research that an estimated 20% of all wetlands in Wisconsin are considered non-federal/isolated and therefore would be exempt under this bill.

Therefore, from October 1, 2012 – October 20, 2017 there were an estimated 172 IP permits for non-federal wetland impacts issued and 758 GP permits for non-federal wetland impacts issued.

Currently, fees for IPs are \$800/activity and \$500/activity for most GPs. In addition, state and federally funded projects are exempt from permit fees. Fee exempt project types include municipal roads and habitat enhancement and/or restoration activities. Based on available data, the exemption for non-federal wetlands will result in an estimated decrease in individual permit (IP) fees of \$34,400/year and decrease of general permit (GP) fees of \$31,700/year for a net estimated decrease in fees of \$66,100. Office of Energy GPs will also be impacted, resulting in an estimated reduction in fee revenues of \$2,200.

Total revenue loss is estimated at \$68,300.

## B. Costs

One-time costs to update internal procedures, promulgate rules, update permits, conduct outreach and staff training, and other implementation tasks are estimated at \$54,000.

Annual, ongoing costs are estimated at \$14,300 for staff time needed to establish separate tracking for mitigation associated with wetland fill for non-federal wetlands.

## **Long-Range Fiscal Implications**
