Assumptions Used in Arriving at Fiscal Estimate

SB 242 provides \$2,500,000 GPR annually to be distributed to Local Public Health Departments for the purpose of communicable disease prevention and control. The Agency would be responsible for establishing an equitable allocation formula, with consideration for base allocation (or, the level of health office), general population, target population, risk factors, and geographic area.

Because the Agency does not have an existing allocation structure based on the control and prevention of communicable disease, 1.0 LTE GPR Contract Specialist—Advanced is required to research considered factors and work with the Local Public Health Departments to determine the best allocation of funds, at a cost of \$31,200 GPR. Once the allocation is established, the Agency expects that maintenance and review of the distribution, as well as communication with Local Public Health Department contacts, may be accomplished with 0.3 FTE GPR Contracts Specialist—Advanced, for a cost of \$24,000 a year.

Local Public Health Departments can expect to receive additional revenue under this bill. If the Agency is able to develop a distribution that takes into account the current needs and capabilities of Local Public Health Departments, there should be no increase in associated Local costs.

Long-Range Fiscal Implications
