Analysis by the Legislative Reference Bureau

This bill authorizes the operation of personal delivery devices (PDDs) on sidewalks and crosswalks.

Under this bill, a PDD is defined as an electronically powered device that 1) is intended primarily to transport property on sidewalks and crosswalks; 2) weighs less
than 80 pounds, excluding cargo; 3) is capable of a maximum speed of 10 miles per hour or less; and 4) is capable of operating with and without active control or monitoring by an individual. A PDD operator is defined as an entity or its agent that exercises control over, or that monitors, the navigation system and operation of the PDD.

This bill authorizes the operation of a PDD on any sidewalk or crosswalk, unless the authority with jurisdiction of the sidewalk or crosswalk prohibits such operation. In general, PDD operators must ensure that a PDD operates in compliance with rules of the road regulating the conduct of pedestrians. In addition, PDD operators must ensure that all of the following are satisfied when operating a PDD on a sidewalk or crosswalk:

1. A PDD operator must control or monitor the navigation and operation of the PDD.
2. A PDD may not go on a roadway except while crossing at a crosswalk.
3. A PDD must be operated with due care.
4. A PDD must comply with each traffic signal and sign.
5. The speed of a PDD may not exceed 10 miles per hour.

This bill also provides that a PDD must be equipped with a braking system, a plate or marker that is in a position to be clearly visible and that identifies the name and contact information of the PDD operator, and, if operated during hours of darkness, a white light visible from the front and a red reflector visible from the rear.

For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
