**Analysis by the Legislative Reference Bureau**

Under this bill, the laws under which the Department of Natural Resources currently regulates metallic mining, other than iron mining, apply to mining for iron and to mining for nonferrous minerals.

Under current law, DNR regulates mining for metallic minerals. Prior to the enactment of 2013 Wisconsin Act 1, the laws under which DNR regulated metallic mining applied to mining for ferrous and nonferrous minerals. 2013 Wisconsin Act 1 created new laws for regulating iron mining and modified the laws regulating metallic mining so that they applied to mining for nonferrous minerals only. This bill changes the laws relating to the regulation of iron mining so that the laws are substantially the same as they existed before enactment of 2013 Wisconsin Act 1.

Under current law, certain forested land may be designated as managed forest land (MFL) under a program administered by DNR. Under this program, the owner of land designated as MFL makes an annual acreage share payment in lieu of property taxes. In exchange, the landowner must have a management plan prepared for the land and must open the MFL to the public for certain recreational activities. The landowner may designate a portion of the land as closed to public access and make an additional payment per acre. 2013 Wisconsin Act 81 generally provided that the requirements with regard to public access to MFL do not apply to an area of land within a certain distance of a proposed iron mining site. 2013 Wisconsin Act 81 also required an MFL owner to make an additional payment per acre for land located in a proposed ferrous mining site if the land is not open to all of the activities for which public access is generally required. This bill changes the laws with respect to ferrous mining sites located on MFL so that the laws are substantially the same as they existed before enactment of 2013 Wisconsin Act 81.

in the office of the register of deeds of the county where the property is located, except
that any provision of an exploration mining lease entered into after April 25, 1978,
granting an option or right to determine the quality and quantity of nonferrous
metallic metalliferous minerals under a prospecting permit shall be limited to a term
not exceeding 10 years from the date that the lessee applies for a prospecting permit
under s. 293.35, if the lessee applies for the prospecting permit within 10 years from
the date on which the exploration mining lease is recorded in the office of the register
of deeds of the county where the property is located.

SECTION 58. 107.20 (2) of the statutes is amended to read:

or amend rules governing this type of activity, practice or facility if the department
determines that the amendment or promulgation of rules is necessary to protect
public health, safety or welfare.

shall apply for the permits and approvals identified in the listing. The department
shall determine whether an application under this subd. 3. b. is complete and, no
later than 30 days after the application is filed, notify the applicant about the
determination. If the department determines that the application is incomplete, the
notice shall state the reason for the determination. An applicant may supplement
and refile an application that the department has determined to be incomplete.
There is no limit on the number of times that an applicant may refile an application
under this subd. 3. b. If the department fails to determine whether an application

received by the department, the department does not either request additional  
information or inform the applicant that a wetland individual permit will be required  
as provided in par. (i), the discharge shall be considered to be authorized under the
