Analysis by the Legislative Reference Bureau

This bill requires the Department of Natural Resources to administer a program to provide grants to cities, villages, towns, and counties for the testing of privately owned wells. The bill also makes changes to the well compensation grant program currently administered by DNR.

Under current law, an individual owner or renter of a contaminated private well may apply for a grant from DNR to cover a portion of the costs to treat the water, reconstruct the well, construct a new well, connect to a public water supply, or fill and seal the well. To be eligible for a grant the well owner or renter’s annual family income may not exceed $65,000. A grant awarded under the program may not exceed 75 percent of a project’s eligible costs and may not cover any part of a project’s eligible costs that exceeds $12,000. In addition, if the well owner or renter’s annual family income exceeds $45,000, the amount of the award is reduced by 30 percent of the amount by which the annual family income exceeds $45,000.

The bill increases the family income limit to $100,000 and increases the grant award limit to 75 percent of no more than $16,000 of the project’s eligible costs. The
bill also increases the amount of annual family income that triggers a reduction of an award to $65,000.

Under current law, a well that is contaminated only by nitrates is eligible for a grant only if the well is a water supply for livestock, is used at least three months in each year, and contains nitrates in excess of 40 parts per million. The bill eliminates the requirement that the well be used for livestock.

For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
