AN ACT to create 29.603 of the statutes; relating to: enforcement of federal and state laws relating to the management of the wolf population and to the killing of wolves and expenditure of funds for wolf management purposes.

Analysis by the Legislative Reference Bureau

This bill makes changes to the laws regulating wolf hunting and the laws authorizing funding for wolf management activities.

Under current law, the Department of Natural Resources is required to allow the hunting and trapping of wolves if the wolf is not listed on the U.S. list of endangered and threatened species and is not listed on the state endangered list.

This bill prohibits a law enforcement officer from enforcing a federal or state law that relates to the management of the wolf population in this state or that prohibits the killing of wolf in this state. The bill prohibits DNR from expending any funds for the purpose of managing the wolf population in this state other than for the purpose of making payments under the endangered resources program to persons who apply for reimbursement for certain damage caused by wolves or protecting private property, including domestic cattle, from wolf depredation. The bill also prohibits DNR from taking any action to inform or support federal law enforcement officers regarding the enforcement of any federal or state law relating to wolves. The bill specifies that these prohibitions apply only if wolves are listed on the U.S. list of endangered and threatened species. Under the bill, if wolves are removed from that list, the prohibitions in the bill will no longer apply.
For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
