Analysis by the Legislative Reference Bureau

Under this bill, if the Department of Natural Resources finds that the holder of a Wisconsin Pollutant Discharge Elimination System permit has violated certain provisions of the permit, DNR must notify the owners of any wells that may be negatively affected by the violation and the county or counties in which the permit holder and any wells that may be negatively affected by the violation are located. The bill requires DNR to provide these notices within 30 days after finding that a violation has occurred and within 24 hours if DNR determines that the violation poses a serious risk to public health. The bill also requires DNR to establish, by rule, procedures for providing the required notice.
