4
and 16.867 of the statutes; relating to: projects included in the Authorized
5
State Building Program, project approvals by the Building Commission, and
6
selection of project architects and engineers.

Analysis by the Legislative Reference Bureau
Under this bill, the Building Commission may authorize money from the state
building trust fund to be available for any project costing $1,000,000 or less, and the
Building Commission may authorize the design and construction of any building, the
acquisition of land, or the repair or improvement of any building, structure, or
facility that costs more than $1,000,000 only if the project is enumerated in the state
building program. Under current law, each of those thresholds is set at $760,000.
Subject to limited exceptions, the bill also prohibits the state from entering into
a contract for the construction of or addition to any building in connection with a
building project involving a cost that exceeds $300,000 without the approval of the
Building Commission. Current law sets that threshold at $185,000. The bill
includes a corresponding adjustment to certain thresholds for projects of the State
Fair Park Board.
The bill also raises from $185,000 to $300,000 the threshold for projects that are
subject to single prime contracting, and the bill creates an exception to single prime
contracting for projects that are part of a larger project that is not subject to single prime
contracting.
contracting, including certain bidding requirements, for certain construction projects. Specifically, under the bill, the Department of Administration may let any construction project that exceeds $300,000 to a contractor whose primary business is the performance of a trade (single trade contractor) for all work on the project if at least 85 percent of the estimated construction cost of the project is for work that involves the trade that is the primary business of the single trade contractor. For purposes of the bill, “trade” means mechanical, electrical, plumbing, or fire protection work. The current law requirements with respect to the solicitation of bids or proposals for construction projects and the award of contracts to the lowest responsible bidder apply to single trade contracts under the bill. The single prime contracting process for certifying, selecting, and contracting with subcontractors does not apply to single trade contractors under the bill.

Finally, under the bill, the secretary of administration is required to establish a committee for each construction project under the department’s supervision, except certain emergency projects, for the purpose of selecting an architect or engineer for the project. If the estimated cost of a construction project is $7,400,000 or more, the selection committee must use a request-for-proposal process established by the department to select an architect or engineer for the project based on qualifications.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
