2017 SENATE JOINT RESOLUTION 75

September 14, 2017 – Introduced by Senators ERPENBACH, BEWLEY and RINGHAND, cosponsored by Representatives POPE, C. TAYLOR, HEBL, VRUWINK, ANDERSON, MILROY, SARGENT, WACHS, SUBECK, BERCEAU, HORLACHER, KLEEFISCH and BOWEN. Referred to Committee on Senate Organization.

Relating to: proclaiming October 9, 2017, as PANDAS and PANS Awareness Day.

Whereas, it is the custom of this legislative body to recognize official days to increase awareness of serious illnesses that affect the lives of citizens of Wisconsin such as PANDAS (Pediatric Autoimmune Neuropsychiatric Disorders Associated with Streptococcal Infections) and PANS (Pediatric Acute-onset Neuropsychiatric Syndrome); and

Whereas, a diagnosis of PANDAS or PANS means a child has a sudden, dramatic change in personality displayed as obsessive-compulsive disorder (OCD) together with accompanying symptoms following a strep, bacterial, or viral infection. The OCD can display as intense fear or anxiety. Accompanying symptoms may include tics, anxiety, depression, behavioral regression, deterioration in school performance, sensory sensitivities, severely restricted food intake, and more; and

Whereas, researchers have begun to substantiate that this syndrome involves a misdirected autoimmune process that affects or weakens the blood-brain barrier. The inflammatory process irritates a region of the brain that manages a variety of
functions such as movement, cognitive perception, habit, executive “logic-based”
thinking, emotions, and the endocrine system; and

Whereas, a conservative estimate of prevalence is 162,000 in the United States
and 7,000 in Wisconsin alone; PANDAS/PANS is likely as common as pediatric
cancer and pediatric diabetes and can seriously affect the healthy outcome of a child’s
life; and

Whereas, the National Institute of Mental Health estimates that up to 30
percent of children being treated for mental health disorders could be restored to
health by proper diagnosis and treatment of PANS and PANDAS; and

Whereas, PANDAS/PANS is often misdiagnosed and undertreated. Treatment
varies by the needs of the child, but may include antibiotics, steroids, IVIG
(intravenous immunoglobulin), plasmapheresis, cognitive behavioral therapy, and
anti-inflammatory medications; and

Whereas, PANDASNetwork.org is a 501 (c) (3) nonprofit corporation dedicated
to improving the diagnosis and treatment of children with PANDAS/PANS.
PANDAS Network is also a conduit for researchers to navigate collaborations and for
the medical community to find information; and

Whereas, it is imperative that there be greater public awareness of this health
issue, and more must be done to increase activity at the local, state, and national
levels; now, therefore, be it

Resolved by the senate, the assembly concurring, That the legislature
proclaims October 9, 2017, as PANDAS and PANS Awareness Day; and, be it further

Resolved, That the senate chief clerk shall provide a copy of this joint
resolution to Scott and Erica Guetzlaff of Oregon, WI who are working to raise
awareness of PANS and PANDAS on behalf of their daughter; and, be it further
Resolved, That the senate chief clerk shall provide a copy of this joint resolution to PANDASNetwork.org.
