Fiscal Estimate Narratives DNR 3/4/2020

LRB Number 19-4534/1	Introduction Number	AB-0890	Estimate Type	Original			
Description							
creating the water fund for our future							

Assumptions Used in Arriving at Fiscal Estimate

The bill creates a new non-lapsible trust fund, designated as the water fund for our future, to consist of \$10 million transferred biennially from the general fund, plus all moneys collected from settlement agreements. It has three main provisions:

1. It allows the Department to use funds from the rapid response account of the water fund for our future to respond to natural disasters and public health emergencies. Funds could be used to cover the cost of remediation and to notify, relocate, and assist people affected by a natural disaster or public health emergency.

State Fiscal Effect

A. One-time Costs

The Department would incur an estimated \$49,500 in one-time staffing costs to promulgate administrative rules for the use of monies deposited into the rapid response account.

B. Ongoing Costs

The Department assumes that this provision pertains to natural disasters or public health emergencies affecting surface water or groundwater. In addition, it assumes that these events do not rise to the level of a federal disaster declaration; therefore, response costs that the Department incurs would not be reimbursable from FEMA or other federal agencies.

The Department estimates that 1.0 FTE and ongoing costs of \$99,000 for salary, fringe benefits and supplies would be needed to implement the provisions of the bill relating to the rapid response account.

The amount of funds that the Department would be able to use from the rapid response account on an annual basis is indeterminate.

2. It allows the Department to seek reimbursement from responsible parties for funds expended from the water fund for our future.

State Fiscal Effect

The fiscal impact of this provision is indeterminate.

3. It allows the Department, or any other state agency, to submit a request to the Joint Committee on Finance (JCF) for supplemental funds from the water fund for our future.

State Fiscal Effect

The fiscal impact of this provision is indeterminate. As the bill is worded, it is unclear what criteria that agencies would use to determine if a request for supplemental funds could be advanced to JCF for consideration, or what monies would be available after transfers have been made to the rapid response account and/or to the budget stabilization fund.

It is foreseeable that DNR alone could demonstrate the need for \$10 million or more clean water-related projects

each biennium.

Long-Range Fiscal Implications
