Fiscal Estimate Narratives DNR 7/18/2019

LRB Number	19-3226/1	Introduction Number	SB-310	Estimate Type	Original		
Description							
regulating fire fighting foam that contains certain contaminants and granting rule-making authority							

Assumptions Used in Arriving at Fiscal Estimate

This bill prohibits the use of fire fighting foams that are designed for use on a flammable liquid fire and that contain intentionally added perfluoroalkyl or polyfluoroalkyl substances (PFAS), unless used in emergency fire fighting or fire

prevention operations; or unless used for testing purposes if the testing facility has in place appropriate containment, treatment, and disposal measures, as determined by rule by the Department of Natural Resources. A person who violates this prohibition is subject to the same penalty that applies under current law to other general environmental provisions, which is a forfeiture of between \$10 and \$5,000 for each violation.

In addition, the bill requires the department to promulgate rules within 7 months of the act taking effect.

I. State Fiscal Effect

The Department would reallocate staff time away from other core duties to implement emergency and permanent rule making. Estimated staff time for rules is 400 hours at an estimated one-time cost of \$16,000 (400 hrs. x \$40/hr. salary/fringe). These costs would be absorbed within the Department's existing budget.

II. Local Fiscal Effect

Costs for local units of government would increase by an indeterminate amount because of the need to find alternate fire fighting materials.

Local governmental units' fire departments that currently use class B fire fighting foam containing PFAS could decide to replace that FFF with a new foam that does not contain PFAS. A brief online search noted that foams not made with fluorinated surfactants have been available for training use to simulate the usage of FFF products. However, the PFAS definition is a very broad and comprehensive and local governments would need to ensure proper alternatives. Additional costs could occur when containing, treating, and disposing of class B fire fighting foam that was used for testing purposes.

Long-Range Fiscal Implications
