## Fiscal Estimate Narratives

DNR 1/10/2020

LRB Number	19-5188/1	Introduction Number	SB-670	Estimate Type	Corrected
<b>Description</b> exempting certain waste-to-energy facilities from tipping fees					

### Assumptions Used in Arriving at Fiscal Estimate

The bill creates a tipping fee exemption for existing facilities that incinerate solid waste for the purpose of energy recovery, commonly called waste-to-energy facilities. The exemption does not apply to ash residue generated at these facilities. The bill also makes a terminology change, referring to facilities exempt from the tipping fee as “qualified facilities” instead of “qualified materials recovery facilities.”

#### State Fiscal Effect

##### A. Assumptions

The bill would impact one facility in the state, the La Crosse Excel Energy Facility. The Barron County Waste to Energy facility would not qualify at this time as it does not possess a solid waste processing facility license.

##### B. Costs

The bill would have minimal impact upon expenditures other than the updating of two forms and one guidance document.

##### C. Revenues

The La Crosse French Island waste-to-energy facility reported that the average monthly percent of residue that would be eligible for the exemption was 24.6% in 2018 (ranging monthly from 18.9% to 35.2%). In tonnage, this translates to 17,619.6 tons out of the 71,698.6 tons processed.

The bill would exempt the La Crosse French Island WTE facility from from the following tipping fees: Groundwater fee (\$0.10/ton); well compensation fee (\$0.04/ton); siting board fee (\$0.007/ton); recycling fee (\$7.00/ton); and environmental repair fee (\$5.70/ton). The combined total fee exemption would be \$12.847/ton.

Using the aforementioned tonnage data and tipping fee amounts, the Department estimates the bill would reduce annual tipping fee revenues by \$226,400 (17,619.6 tons \* \$12.847).

### Long-Range Fiscal Implications
