Fiscal Estimate Narratives

DPI 2/13/2020

LRB Number	19-1171/2	Introduction Number	SB-759	Estimate Type	Original
Description use of epinephrine prefilled syringes and standing order for epinephrine					

Assumptions Used in Arriving at Fiscal Estimate

Current law allows designated school personnel, school nurses, and authorized entities and individuals who have completed a training program to provide or administer epinephrine auto-injectors to students and other individuals. Students are also allowed under current law to possess and use an epinephrine auto-injector in certain circumstances.

Current law allows prescribers to prescribe epinephrine auto-injectors in the name of the school or the name of the authorized entity or individual. This bill adds prefilled syringes to the authorities granted for prescription, possession, and administration of epinephrine auto-injectors in current law.

A "prefilled syringe" is defined in the bill as "a device that is approved by the federal Food and Drug Administration, that contains a dose of epinephrine, and that is used for the manual injection of epinephrine into the human body to prevent or treat a life-threatening allergic reaction."

The bill allows a health care provider with prescribing authority who is employed by or under contract with the Department of Health Services to issue a statewide standing order for the dispensing of epinephrine auto-injectors or prefilled syringes for use by trained individuals. The bill also allows prescribers to issue a standing order for the dispensing of epinephrine auto-injectors or prefilled syringes for use by trained individuals.

State: Increase costs, absorbable within agency budget

DPI will absorb the cost of producing a new training video for prefilled syringes of epinephrine. Videos generally cost up to \$4,000 to produce. Likewise, other duties associated with implementing this bill, e.g., answering questions from school districts, will be absorbed by existing staff.

Long-Range Fiscal Implications
