June 7, 2019 - Introduced by Senators TIFFANY, CRAIG, KAPENGA, KOYENGA, NASS, WANGGAARD and BERNIER, cosponsored by Representatives SANFELIPPO, BRANDTJEN, GUNDREUM, HUTTON, KNODL, KUGLITSCH, MAGNIFICI, NEYLON, OTT, QUINN, RAMTHUN and WICHGERS. Referred to Committee on Transportation, Veterans and Military Affairs.

AN ACT relating to: a fixed-price variable-scope contract for local bridge construction and maintenance.

Analysis by the Legislative Reference Bureau

This bill requires that, no later than December 31, 2019, the Department of Transportation must let a fixed-price variable-scope contract, i.e., a contract in which the contractor provides the maximum amount of work at a cost not to exceed a price set by DOT. Under this bill, the fixed-price variable-scope contract provides $150,000,000 for the construction and maintenance of certain local bridges. Also under this bill, no later than three months after completion of construction and maintenance work under the contract, DOT must submit to the legislature a report assessing the use of the fixed-price variable-scope contracting procedure in this contract.

For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

SECTION 1. Nonstatutory provisions.

(1) FIXED-PRICE VARIABLE-SCOPE BRIDGE CONTRACT. Notwithstanding s. 84.06 (2), not later than December 31, 2019, the department of transportation shall let a
contract in which the contractor provides the maximum amount of work for
$150,000,000 for the construction and maintenance of bridges that are not on the
state trunk highway system or on marked routes of the state trunk highway system
designated as connecting highways. In letting this contract, the department of
transportation shall do all of the following:

(a) Solicit and evaluate the qualifications of bidders. The department’s request
for qualifications shall contain all of the following:

1. A description of the improvements being sought.

2. A requirement that the bidder identify certain personnel and describe the
experience of the personnel and the conditions under which personnel may be
replaced.

3. The evaluation criteria for the qualifications and the relative importance of
those criteria. The evaluation criteria may address the bidder’s technical and
financial qualifications.

4. Any prequalification, licensing, and registration requirements.

5. The maximum number of bidders the department will short-list for
submission of proposals.

6. Any other relevant information the department determines is appropriate.

(b) Create a short list of not fewer than 2 and not more than 4 of the most highly
qualified bidders.

(c) Solicit proposals from bidders placed on a short list under par. (b). Prior to
receiving proposals, the department may conduct confidential meetings and
exchange confidential information with each bidder on the short list to promote
understanding of the request for proposals or discuss other issues related to the
letting of the contract. The request for proposals shall contain all of the following:
SENATE BILL 278

1. The form and amount of required bid security.

2. The terms of the contract, including applicable scope and performance requirements, schedule or completion date requirements, subcontractor requirements, payment and performance security requirements, and insurance requirements.

3. The requirements for the technical component of the proposal, including a description of the level of design, scope and type of renderings, drawings, and specifications to be provided in the proposal.

4. The fixed price the department will pay for the work requested.

5. Requirements regarding the bidder’s qualifications.

6. Any other relevant information the department determines is appropriate.

(d) Create a committee to evaluate proposals. The committee shall consist of not fewer than 5 individuals, not fewer than 3 of whom are transportation design professionals, including a member of this state’s largest transportation builders group. Each member of a committee shall certify that no conflict of interest exists between the member and the person submitting a proposal. If the department determines a conflict exists with a member, the department shall remove the member from the committee and appoint a replacement member.

(e) Evaluate each proposal and determine whether the proposal meets the technical requirements and is otherwise responsive to the request for proposals for the project.

(f) Award the contract to the responsive bidder that proposes the largest volume of work within the price that the department fixed for the project.

(2) FIXED-PRICE VARIABLE-SCOPE BRIDGE CONTRACT REPORT. No later than 3 months after completion of all construction and maintenance work under the
contract let under sub. (1), the department of transportation shall submit to the appropriate standing committees of the legislature, as determined by the speaker of the assembly and the president of the senate, a report assessing the procedure used in letting the contract under sub. (1).

(END)
