2019 SENATE BILL 380

AN ACT to repeal 49.45 (29w) (b); to renumber 49.45 (29w) (a); to create 49.45 (61), 49.46 (2) (b) 21., 49.46 (2) (b) 22. and 49.46 (2) (b) 23. of the statutes; and to affect 2019 Wisconsin Act 9, section 9119 (2); relating to: coverage of services under Medical Assistance provided through telehealth and other technologies, extending the time limit for emergency rule procedures, and granting rule-making authority.

Analysis by the Legislative Reference Bureau

This bill requires the Department of Health Services to provide reimbursement under the Medical Assistance program for any benefit that is covered under the Medical Assistance program, delivered by a certified Medical Assistance program, and provided through interactive telehealth. DHS must pay for such a service provided by a certified provider of Medical Assistance at a distant site an amount equal to the amount the certified provider would receive under the Medical Assistance program if the service were provided through a method other than telehealth. The bill also requires DHS to provide as a benefit under the Medical Assistance program and provide reimbursement under the Medical Assistance program for all of the following: a consultation conducted through interactive telehealth between a certified provider and a Medical Assistance recipient’s provider; remote patient monitoring of a Medical Assistance recipient; asynchronous telehealth service, also known as store-and-forward; a service provided through
communication technology that is covered under the federal Medicare program; and any other telehealth service specified by DHS by rule. DHS may exclude services by rule from Medical Assistance reimbursement and may provide reimbursement by rule for certain services that are not typically considered telehealth services.

The bill defines “telehealth” as a practice of health care delivery, diagnosis, consultation, treatment, or transfer of medically relevant data by means of audio, video, or data communications that are used either during a patient visit or a consultation or are used to transfer medically relevant data about a patient. “Telehealth” generally does not include communications delivered solely by audio-only telephone, facsimile machine, or electronic mail unless the department specifies otherwise by rule. Under the bill, “interactive telehealth” is telehealth delivered using multimedia communication technology that permits 2-way, real-time, interactive communications between a provider at a distant site and the Medical Assistance recipient or the recipient’s provider. “Remote patient monitoring” is telehealth in which a patient’s medical data is transmitted to a provider for monitoring and response if necessary. “Asynchronous telehealth service” is telehealth that is used to transmit medical data about a patient to a provider when the transmission is not a 2-way, real-time, interactive communication.

Under the bill, DHS is prohibited from requiring a certified provider of Medical Assistance that provides a reimbursable service under the bill to obtain an additional certification or meet additional requirements solely because the service was delivered through telehealth, except that DHS may require, by rule, that the transmission of information through telehealth be of sufficient quality to be functionally equivalent to face-to-face contact. DHS may apply any requirement that is applicable to a covered service that is not provided through telehealth to any service provided through telehealth under the bill. The bill prohibits DHS from limiting coverage or reimbursement of a service provided through telehealth under the bill based on the location of the Medical Assistance recipient when the service is provided.

Current law requires reimbursement under the Medical Assistance program of certain mental health services provided through telehealth and defines telehealth for that purpose. The bill eliminates the current provision that applies only to mental health services. The bill prohibits DHS from limiting coverage or reimbursement of a service provided through telehealth under the bill based on the location of the Medical Assistance recipient when the service is provided.
