11 vehicles defined as autocycles.

Analysis by the Legislative Reference Bureau

This bill creates a definition of an autocycle, which is a three-wheeled motor vehicle with operation controls similar to an automobile.

Under current law, there are two types of motorcycles. A "Type 1 motorcycle" is a motor vehicle which has either two wheels in tandem and a seat for the operator

SENATE BILL 86

or three wheels and unenclosed seating for the operator and passengers. A “Type 2 motorcycle” is a motor vehicle with at least three wheels and an enclosed space for the operator and passengers. This bill eliminates the definition for the Type 2 motorcycle and creates a definition for an autocycle. A “Type 1 autocycle” is defined as a motor vehicle, excluding a tractor, an all-terrain vehicle, or a utility terrain vehicle, that is designed and built to have a steering wheel, foot-operated pedals for controlling acceleration and braking, and at least three wheels in contact with the ground. A “Type 2 autocycle” is a vehicle meeting the current definition of a Type 2 motorcycle.

Under current law, a motor vehicle may not be operated upon a highway in this state without a current, valid registration. Generally, the fee for registering an automobile with the Department of Transportation is \$75 annually. The fee for registering a motorcycle is \$23 biennially. Under this bill, the fee for registering an autocycle is \$45 annually.

Under current law, no person may operate a motor vehicle upon a highway in this state unless the person possesses a valid operator’s license. Additional endorsements are required for the operation of certain vehicles, including motorcycles. This bill classifies autocycles as “Class D” vehicles, which means they may be operated with the regular license issued by DOT without the need for additional endorsements.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
