Fiscal Estimate Narratives DNR 3/30/2022

LRB Number	21-6057/1	Introduction Number	AB-1137	Estimate Type	Original	
Description						
the regulation of metallic mining and related activities and making an appropriation						

Assumptions Used in Arriving at Fiscal Estimate

I. Mining Components of the Bill

The bill changes the laws under which the Department of Natural Resources currently regulates mining so that the laws are substantially the same as they existed before enactment of 2013 Act 1, 2013 Act 81, and 2017 Act 134.

Fiscal Effect

The fiscal effects of the proposed changes to the laws regulating metallic mining are directly related to the size and scope of actual projects. Currently, there are no active or proposed metallic mining projects; therefore, any effort to quantify a fiscal effect would be highly speculative and is therefore considered indeterminate at both the state and local level.

II. Forestry Components of the Bill

The bill changes the laws under which the Department of Natural Resources currently administers the Managed Forest Law (MFL) Program so that the laws are substantially the same as they existed before enactment of 2013 Act 81.

A. State Fiscal Effect

The bill would have no fiscal impact to DNR.

B. Local Fiscal Effect

Closed acreage fee revenues that are retained by local units of government could decrease by an indeterminate amount as a result of the MFL statutory language that is repealed under the bill.

Long-Range Fiscal Implications
