Assumptions Used in Arriving at Fiscal Estimate

Under current law, individuals may claim the nonrefundable angel investment tax credit equal to 25% of their eligible investment in a qualified new business venture that is certified by the Wisconsin Economic Development Corporation (WEDC). The credit may not be sold or otherwise transferred.

This bill allows the angel investment tax credit to be sold or otherwise transferred to another taxpayer. A person eligible to claim the angel investment tax credit may sell or otherwise transfer the credit to another person who is subject to Wisconsin individual income tax if the person notifies WEDC and the Department of Revenue of the transfer and submits a copy of the transfer documents. The bill provides that a person may not sell or otherwise transfer a credit more than once in a 12-month period and WEDC may charge a fee of up to 5% of the credit amount. This fiscal estimate pertains to the tax revenue impact of the bill and not the WEDC fee for transfers.

In fiscal year 2021, individuals used about \$7.2 million of angel investment tax credit against tax liability and carried over about \$14.0 million of unused credit. If individuals were able to sell those unused credits to other individuals who could apply them against Wisconsin tax liability, revenue would have decreased by approximately \$14.0 million in fiscal year 2021. To the extent that some portion of the credit remains unused, the fiscal effect would be smaller. The \$14.0 million balance of unused credit reflects an accumulation of unused credit over multiple years and a potential one-time revenue loss from initially allowing credit transfers.

In 2020 WEDC reported \$44.5 million of qualified angel investments for a total new credit of \$11.1 million. In general, if \$11.1 million of new credit are generated each year and \$7.2 million of credit are used each year, the remaining, unused \$3.9 million of credit represents the potential ongoing revenue loss from allowing credit transfers. Again, to the extent that some portion of the credit remains unused, the ongoing fiscal effect would be smaller.

The Department anticipates incurring \$5,410 in one-time costs and \$2,610 in ongoing costs to administer the credit changes in this bill. Costs are associated with updating publications, claim processing procedures, and recordkeeping. The department cannot absorb these costs.

Long-Range Fiscal Implications
