

## Fiscal Estimate Narratives

DNR 3/21/2022

LRB Number	<b>21-5197/1</b>	Introduction Number	<b>SB-1067</b>	Estimate Type	<b>Original</b>
<b>Description</b> testing for PFAS in schools and daycares and making an appropriation					

### Assumptions Used in Arriving at Fiscal Estimate

The bill provides \$750,000 of one-time funding in Fiscal Year 2021-22 for testing water supplies for PFAS contamination in schools and buildings used for child care.

#### I. Assumptions

1. This estimate assumes that it costs \$500 to test a water sample for PFAS. Actual costs range from \$400-\$600 per sample.
2. Based on 2019-2020 data, the Department of Public Instruction (DPI) reported that Wisconsin has nearly 2,200 public schools.
3. According to DPI, there are approximately 800 private schools in Wisconsin.
4. Based on 2019-2020 data, the Department of Children and Families (DCF) reported that there were nearly 4,000 child care centers and day camps in Wisconsin.

#### II. State Fiscal Effect

1. Based on the \$500/sample estimate, the Department estimates that it would be able to test approximately 1,500 water samples for PFAS with the one-time funding provided in the bill (\$750,000/\$500).
2. The Department would incur an indeterminate amount of staff time and expenses to provide technical assistance to schools and day cares, which would be absorbed among current staff and within the Department's existing operations budget.
3. The Department would coordinate implementation of the bill with the Department of Health Services and Department of Children and Families.

### Long-Range Fiscal Implications
