Assumptions Used in Arriving at Fiscal Estimate

This bill modifies the collection of DNA surcharge of \$250 to only be required the first time a person is sentenced or placed on probation for a misdemeanor or for a felony, rather than on each occurrence.

This bill would decrease revenue to each county as a share of the DNA surcharge kept by the county. It would also reduce GPR-E to the state. The amount of the decrease is indeterminate but would be calculated by the Department of Justice.

The bill impacts the court in that when a sentence or probation is imposed, the DNA biological specimen must only be produced if it is the first sentence or probation. It may result in additional staff resources to educate the judges on the modifications to the DNA surcharge and collection.

Long-Range Fiscal Implications
