creating a Mississippi River erosion control revolving loan program, extending the time limit for emergency							

creating a Mississippi River erosion control revolving loan program, extending the time limit for emergency rule procedures, providing an exemption from emergency rule procedures, granting rule-making authority, and making an appropriation

Assumptions Used in Arriving at Fiscal Estimate

The bill establishes a revolving loan program to assist municipalities and homeowners where the structural integrity of municipal buildings or homes are threatened by Mississippi River shoreline erosion. The bill appropriates \$2 million for this purpose and increases DNR's position authorization by 0.5 FTE to administer the program. The bill requires DNR to promulgate rules to administer the program, including eligibility requirements and income limitations, and authorizes DNR to promulgate emergency rules for the period before permanent rules take effect.

I. Assumptions

A. Existing revolving loan programs for municipal wastewater and drinking water infrastructure improvements may be used as models to establish the loan program prescribed in the bill.

B. The department may coordinate with the Wisconsin Department of Military Affairs Hazard Mitigation Assistance Programs, which provides grant funding for similar types of projects, to establish the Ioan program prescribed in the bill.

II. State Fiscal Effect

A. One-Time Costs

The department would incur one-time costs to promulgate emergency and permanent rules and to develop a new loan program. Tasks would include the following:

- 1. Complete the rule promulgation process;
- 2. Develop loan application form and processes;
- 3. Develop guidance materials:
- 4. Develop forms for reporting and requesting disbursement payments;
- 5. Establish a process for awarding this specific type of financial assistance; and
- 6. Prepare outreach materials for the DNR website and other relevant platforms.

These tasks are estimated to result in a one-time workload increase of approximately 1,500 hours. With an average salary and fringe cost of \$49/hr, one-time costs are estimated to be \$73,500.

B. Ongoing Costs

The department would incur annual, ongoing costs associated with the following tasks to administer the program:

- 1. Assistance to applicants;
- 2. Application and plan review;
- 3. Award allocations;
- 4. Review of required loan documentation;
- 5. Processing financial assistance agreements;
- 6. Construction oversight;
- 7. Expense eligibility review:
- 8. Fund disbursement; and
- 9. Loan closeout procedures.

The annual workload is dependent on a number of factors, most notably the volume of applications received. Some of the technical tasks and reviews will need to be conducted by staff in other programs. Some financial

1/14/22, 10:55 AM View Estimate

tasks will need to be conducted by DNR's Bureau of Finance or DOA Capital Finance.

Though the bill increases DNR's position authority by 0.5 FTE, it is possible that the workload to manage the tasks listed above could exceed this staffing level. It is difficult to estimate the number of projects per year that would be funded. A 1.0 FTE DNR project manager for the existing loan programs at DNR will typically manage 8-10 loan funded projects per year due to the complexity of loan funding and the size of the projects. It is anticipated that it would require up to 1.0 FTE to manage this new program at approximately \$81,600 per year. Of that amount, 0.5 FTE and \$40,800 would be funded out of the \$2 million appropriated in the bill, while the other 0.5 FTE and \$40,800 would be reallocated from existing budgetary resources.

Long-Range Fiscal Implications
