Analysis by the Legislative Reference Bureau

This bill prevents health care entities and credentialing boards from discriminating or retaliating against health care providers for ordering innovative therapies or novel therapies if certain conditions are met, including: 1) the health care provider orders the therapy based on his or her assessment of the patient and any available clinical data supporting the therapy; 2) the patient requests the innovative therapy or novel therapy; and 3) the ordered therapy, if the therapy is a drug, device, or biological product, is either approved or authorized for emergency use by the federal Food and Drug Administration. Further, this bill prevents any health care entity or credentialing board from restricting any health care provider from informing a patient of any innovative or novel therapy that may potentially benefit the patient.
