AN ACT to amend 200.35 (14) (title), 200.35 (14) (a) 2. and 200.35 (14) (b); and to create 200.35 (14) (a) 2. b., 200.35 (14) (d) 3m. and 200.35 (14) (h) of the statutes; relating to: authorization for metropolitan sewerage districts containing a first class city to finance and construct a dredged material management facility located in the city of Milwaukee.

Analysis by the Legislative Reference Bureau

This bill allows a metropolitan sewerage commission for a sewerage district including a first class city (currently only the city of Milwaukee) to finance and construct a dredged material management facility for the Milwaukee Estuary Area of Concern at a location in the city of Milwaukee.

The Milwaukee Estuary is one of the “Areas of Concern” across the Great Lakes identified under the 1987 Great Lakes Water Quality Agreement. The Great Lakes Water Quality Agreement is an agreement between the United States and Canada to restore and protect the waters of the Great Lakes. The U.S. Environmental Protection Agency coordinates U.S. activities under this agreement. The Water Quality Agreement defines an “area of concern” as “a geographic area designated by the Parties where significant impairment of beneficial uses has occurred as a result of human activities at the local level.”

Current law allows a metropolitan sewerage commission for a sewerage district including a first class city to participate in certain shore protection projects, but the provision does not apply to any project after January 1, 1992. The bill would modify
SENATE BILL 425

certain current law requirements, including the date restriction, to specifically allow
the metropolitan sewerage commission to construct projects, including a dredged
material management facility project, before January 1, 2032. Under the bill, the
commission must pay for all the costs of the dredged material management facility
project through its capital budget and may finance the project by issuance of bonds
or notes that must be made payable within 35 years. The bill also provides that the
commission may reserve space in the dredged material management facility for the
disposal of sediment from flood management projects. The bill is contingent upon
the commission adopting a resolution by the end of calendar year 2021 that
establishes a requirement that through 2027, the Milwaukee Metropolitan
Sewerage District’s capital budget levy increases will be at or below 3 percent. The
bill allows for an exemption to the 3 percent limit to address circumstances
associated with a state, city, or county declared state of emergency or an emergency
declaration or major disaster declaration by the Federal Emergency Management
Agency, but only if enacted by a two-thirds majority vote by the commission.
For further information see the state and local fiscal estimate, which will be
printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do
enact as follows:

SECTION 1. 200.35 (14) (title) of the statutes is amended to read:

200.35 (14) (title)  SHORE PROTECTION PROJECTS AND DREDGED MATERIAL
MANAGEMENT FACILITY

SECTION 2. 200.35 (14) (a) 2. of the statutes is amended to read:

200.35 (14) (a) 2. “Project” means -a- any of the following:

  a. A shore protection or erosion control project which consists, in whole or in
     part, of waste rock produced by construction projects undertaken by the commission
     and which has been requested, by resolution, by a political subdivision with territory
     in the district’s service area.

SECTION 3. 200.35 (14) (a) 2. b. of the statutes is created to read:

200.35 (14) (a) 2. b. A dredged material management facility.

SECTION 4. 200.35 (14) (b) of the statutes is amended to read:
200.35 (14) (b) The commission may construct a project under this subsection and may finance and construct a project that is a dredged material management facility. This paragraph does not apply to the construction of any project on or after January 1, 1992.

**SECTION 5.** 200.35 (14) (d) 3m. of the statutes is created to read:

200.35 (14) (d) 3m. Notwithstanding any requirements to the contrary in subds. 1. to 3., for a dredged material management facility constructed by the commission, the commission shall pay for all the costs of the project through its capital budget and may finance the project pursuant to s. 200.55. Notwithstanding s. 67.07, district bonds or notes issued to finance the project shall be made payable within a period of 35 years from the date of the bonds or notes.

**SECTION 6.** 200.35 (14) (h) of the statutes is created to read:

200.35 (14) (h) For a dredged material management facility constructed by the commission, the commission may reserve space in the dredged material management facility for the disposal of sediment from flood management projects.

**SECTION 9101. Nonstatutory provisions; Administration.**

(1) **METROPOLITAN SEWERAGE COMMISSION LEVY INCREASE.** If the metropolitan sewerage commission created under s. 200.23 adopts a resolution by December 31, 2021, that establishes a requirement that through 2027, the Milwaukee Metropolitan Sewerage District’s capital budget levy increases will be at or below 3 percent, then the treatment of s. 200.35 (14) (title), (a) 2. and 2. b., (b), (d) 3m., and (h) takes effect on the effective date of that resolution. If the metropolitan sewerage commission created under s. 200.23 does not adopt such a resolution by December 31, 2021, then the treatment of s. 200.35 (14) (title), (a) 2. and 2. b., (b), (d) 3m., and (h) is void. An exemption to the 3 percent limit is allowable to address circumstances
associated with a state, city, or county declared state of emergency or an emergency declaration or major disaster declaration by the Federal Emergency Management Agency, if enacted by a two-thirds majority vote by the commission.
