1     **AN ACT** *to renumber* 30.122; *to amend* 30.122 (title); and *to create* 30.01 (1h),  
2             30.122 (2), 30.122 (3), 30.2039 and 885.335 of the statutes; **relating to:** use of  
3             fill in commercial waterways and establishing shorelines of Great Lakes  
4             waters.

### *Analysis by the Legislative Reference Bureau*

This bill provides for the lawful public or private use of land that has been above the ordinary high water mark of a commercial waterway or a Great Lakes water since December 9, 1977. Under current law, all permanent alterations, deposits, or structures, other than boathouses, that affect navigable waters are presumed in conformity with the law if they were constructed before December 9, 1977, and did not require a permit at the time of construction.

#### ***Historic fill in commercial waterways***

The bill applies, in part, to fill placed prior to 1977 that created land above the ordinary high water mark of a commercial waterway, which is a specified list of rivers and harbors. If the fill is unauthorized fill for which the Department of Natural Resources has not initiated an enforcement action or is within an authorized bulkhead line and not specifically restricted by a submerged land lease, the owner of the fill may use the fill for any purpose.

#### ***Establishing the shorelines of Great Lakes waters***

The bill applies, in part, to property that 1) includes land that may have been part of the submerged bed of a Great Lakes water at the time of statehood; 2) includes

**SENATE BILL 900**

portions of land that are upland, which is defined to mean land that has been above the ordinary high water mark since December 9, 1977; 3) is within a municipality; and 4) is not subject to a lake bed grant or a submerged land lease and is not landward of the statutorily established shoreline in the city of Milwaukee.

The record title holder of applicable land may submit a proposed shoreline to the municipality in which the land is located. The municipality must approve the proposed shoreline if the municipality determines the proposed shoreline is in the public interest and the proposed uses will promote the interests of the public. If a municipality approves a proposed shoreline, the municipality must submit the approval to DNR for review.

Following a public notice and comment period, DNR must adopt the shoreline approved by the municipality unless DNR determines that a portion of the area landward of the shoreline is not upland or there is not substantial evidence that the shoreline as proposed is in the public interest. A determination by DNR establishes the shoreline for purposes of determining the boundary of title between land held in trust by the state and land held in fee title ownership.

The bill also prohibits the commencement of any action affecting the possession or title of any real estate based on an assertion that the property includes portions of land that may have at one time been submerged beneath a Great Lakes water if the portions of land are upland and not subject to a lake bed grant or a submerged land lease.

For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
