

## Fiscal Estimate Narratives

UWS 7/31/2023

LRB Number	<b>23-2217/1</b>	Introduction Number	<b>AB-0347</b>	Estimate Type	<b>Original</b>
<b>Description</b> requiring an automated external defibrillator at youth athletic activities operated or sponsored by a public or private school and at athletic events of University of Wisconsin System institutions					

### Assumptions Used in Arriving at Fiscal Estimate

The bill requires UW System institutions to have AEDs available for use at athletic events along with individuals proficient in the use of the AED. The bill defines an "athletic event" as an intercollegiate athletic competition in which a UW System institution's team members participate or an organized event at which team members practice or prepare for competition under supervision of a coach. The bill also requires the Board of Regents of the UW System to develop a plan for the use of AEDs at athletic events and requires UW System institutions to implement the plan.

### Long-Range Fiscal Implications

Most, if not all, campuses already have permanent and/or mobile AEDs available in their competition, practice, and recreation locations however the fiscal impact is unclear until guidelines are established for the provisions in the bill.
