Fiscal Estimate Narratives

DOT 11/8/2023

LRB Number 23-4167/1	Introduction Number SB-0431	Estimate Type Original
Description permits for the overweight transport of certain fluid milk products		

Assumptions Used in Arriving at Fiscal Estimate

The Department is unable to provide an estimate on increased costs for this change. While it is assumed that an increase in heavy truck traffic would lead to increased degradation of the pavement and structures, the Department has no reliable way to estimate the number of trips and origin and destination. In addition, there is no generally accepted basic degradation factor that could be used in place of the specific information needed to estimate the impacts. Without a definition of what may all be considered as 'milk products' we are not able to estimate the types of commodities that might be transported and cannot account for the number of all load types that may be impacted. Also, it is anticipated that the routes traveled by the broadening of the definition will be set routes thus degradation will be concentrated on those particular highways (e.g. farms to processors).

Long-Range Fiscal Implications

The long-range fiscal impacts are indeterminate. There will likely be increased pavement and structure deterioration, but the costs associated with maintenance and repair cannot be adequately estimated.
