Chir 4.02 Definitions. As used in this chapter,

(1) “Chiropractic science” means that body of systematic and organized knowledge relating primarily to the identification, location, removal or reduction of any interference to nervous system integrity or nerve energy expression and the resulting change in biomechanical or physiological homeostasis. It is based on the major premise that disease or abnormal function may be caused by abnormal nerve impulse transmission or expression due to biochemical factors, compression, traction, pressure or irritation upon nerves as a result of bony segments, especially of the spine or contiguous structures, either deviating from normal juxtaposition or function which irritates nerves, their receptors or effectors.

(2) “Instrument” means a device employed or applied in accordance with the principles and techniques of chiropractic science, which is used in the practice of chiropractic to diagnose, analyze, treat or prevent the cause of departure from complete health and proper condition of the human.

History: Cr. Register, December, 1984, No. 348, eff. 1−1−85; renum. to be (1) and cr. (2), Register, March, 1990, No. 411.

Chir 4.03 Practice. The practice of chiropractic is the application of chiropractic science in the adjustment of the spinal column, skeletal articulations and adjacent tissue which includes diagnosis and analysis to determine the existence of spinal subluxations and associated nerve energy expression and the use of procedures and instruments preparatory and complementary to treatment of the spinal column, skeletal articulations and adjacent tissue. Diagnosis and analysis may include physical examination, specimen analysis, drawing of blood, blood analysis and the use of x-ray and other instruments.

History: Cr. Register, December, 1984, No. 348, eff. 1−1−85.

(b) Therapeutic x-ray.

(3) A chiropractor may employ a technician to operate x-ray equipment only upon submitting proof satisfactory to the board that the technician has successfully completed a course of instruction approved by the board. Any technician employed may work only under the direct supervision and direction of a licensee.

(c) Hair analysis if it is used as the only determinant for recommending chiropractic treatment or nutritional supplementation.

(d) Therapeutic ultrasound and galvanic therapy may be used by a licensee only if:

1. The licensee has completed the physiologic therapeutics portion of the examinations of the national board of examiners; or,

2. The licensee has completed a course of instruction in therapeutic ultrasound and galvanic therapy approved by the board, submits proof of completion to the board and receives acknowledgement of submittal; and,
