Analysis of Proposed Rules

1. Statutes Interpreted.

Sections 101.12, 145.02 (g), 145.175 and 145.26, Stats.

2. Statutory Authority.

Sections 101.12, 145.02 (3) (g), 145.175 and 145.26, Stats.

3. Related Statute or Rule.

Section 227.116, Stats.

4. Explanation of Agency Authority.

Chapters 101 and 145, Stats., grant the Department general authority for protecting the health, safety and welfare of the public by establishing reasonable and effective safety standards for the construction, repair and maintenance of dwellings, public buildings and places of employment and for the protection of the waters of the state.

5. Summary of Proposed Rules.

The Division of Safety and Buildings within the Department of Commerce is responsible for administering and enforcing safety and health rules relating to the construction and inspection of dwellings, public buildings and places of employment.

The proposed rules consist of miscellaneous changes in chapter Comm 2 and various other chapters in order to address inconsistencies related to the administrative processing of plan submittals to the Safety and Buildings Division.

The proposed rules also correct a typographical error in recently enacted rules pertaining to continuing education obligations for the renewal registrations as automatic fire sprinkler contractor-maintenance. The proposed rules will require 12 hours of continuing education instead of 24 hours.

The proposed rules also amend three building plan review fee tables to correct an error, but does not increase or decrease the fee amounts.

6. Summary of, and Comparison with, Existing or Proposed Federal Regulations.

The activities to be regulated by the rule are specific to the Department's administrative procedures relating to plan review processing times. There are no existing or proposed federal regulations that address the activities to be regulated by the rule.

7. Comparison with Rules in Adjacent States.

The proposed rules consist of administrative changes specific to the Department's procedures relating to plan review processing times. An internet review of Illinois, Iowa, Michigan and Minnesota building and construction rules did not reveal processing times for similar plan review activities.

8. Summary of factual Data and Analytical Methodologies.

A periodic Legislative Audit of the Department's administration of the Multifamily Code program included a review of the Safety and Buildings Division's handling of plan reviews relative to codified processing times. An evaluation by the Division has concluded that the code provisions do not reflect how processing times are determined in light of current management practices and technological improvements that have occurred over the past several years to facilitate the submittal process.

9. Analysis and Supporting Documents used to Determine Effect on Small Business or in Preparation of Economic Impact Report.

The proposed rules will not have an impact on small business in that the revisions clarify Department plan review processes. An economic impact report was not required pursuant to s. 227.137, Stats.
