Affected Chapter 20 Appropriations

Assumptions Used in Arriving at Fiscal Estimate

Rule Summary:

The Bureau of Air Management proposes to amend s. NR 400.02(162)(a), Wis. Adm. Code, to add two organic compounds, dimethyl carbonate and propylene carbonate, to the list of those excluded from the regulatory definition of VOC. Currently, 50 compounds are excluded from the regulatory definition of VOC because they have been shown to have negligible photochemical reactivity. The U.S. Environmental Protection Agency (EPA) has recently determined that these two compounds make a negligible contribution to tropospheric ozone formation. As such, EPA excluded these two compounds from its regulatory definition of VOC through a January 21, 2009 Federal Register notice (74 FR 3437). The proposed revision of s. NR 400.02(162)(a), Wis. Adm. Code, would be consistent with this federal action.

Fiscal Summary:

The proposed changes are being done so that the Department's regulations are updated to reflect current federal regulations. These are definition changes with no fiscal impact to state and local governments, and no anticipated significant fiscal impact to the private sector, so the second page of the fiscal estimate was removed.

Long-Range Fiscal Implications
