Assumptions Used in Arriving at Fiscal Estimate

### Rule Summary:

The changes to Chapter NR 660 create definitions for large quanity generators (LQGs) of hazardous waste and small quanity generators (SQGs) of hazardous waste. The 2009 Wisconsin Act 28 (2009-11 Budget) created new statutory fees for the two types of generators, and required that the Department define these generators in administrative rules.

#### Background:

The Environmental Repair Fee for Generators of Hazardous Waste is a statutorily required base fee/tonnage fee; the revenue from this fee goes into the Environmental Management Account. Previous statutory language stated all LQGs and SQGs of hazardous waste who were required to submit an annual hazardous waste report were required to pay a base fee of \$210, and \$20/ton for hazardous waste generated during the reporting year. The per ton fee did not apply to any wastes that were recycled or reused, and if a facility recycled or reused all of their wastes, they were not required to pay the base fee. As a way to generate more revenue for use in implementing Wisconsin's hazardous waste management program, the 2009 Wisconsin Act 28 amended the statutory language by increasing the base fee from \$210 to \$350 for SQGs and from \$210 to \$470 for LQGs, and by increasing the maximum fee paid from \$17,000 to \$17,500 per year. In addition, the base fee now applies to all generators who are required to report, regardless of whether they recycled or reused any or all of their wastes. The per ton fee remains at \$20/ton.

### Fiscal Estimate:

The most recent data for number of Hazardous Waste Generators is from 2008: 733 SQGs and 448 LQGs. Of the total SQGs, 390 SQGs reported fees, leaving 343 SQGs new to paying the revised fees. Of the total LQGs, 288 reported fees, leaving 160 LQGs new to paying the revised fees.

## Long-Range Fiscal Implications

None

LRB Number	AmendmentNumberifApplicable
Bill Number	Administrative Rule Number NR 5XX

Assumptions Used in Arriving at Fiscal Estimate – Continued

Revenue Increase to Previous Payers:

Number of Previous Payers	Base Fee Increase	Revenue Increase
SQG = 390	SQG = \$140	SQG = \$54,600
LQG = 288	LQG = \$260	LQG = \$74,800
		Total = \$129,480
Revenue Increase to New Payers:		
Number of New Payers	New Fee	Revenue from New Payers
SQG = 343	SQG = \$350	SQG = \$120,500
LQG = 160	LQG = \$470	LQG = \$ 75,200
		Total = \$195,250

It is estimated that based on the number of 2008 HW generators paying the previous fee at the \$17,000 previous maximum, the new revenue with the shift to the new \$17,500 maximum will be \$2,731.

Total estimate new state revenue: \$327,461.

Local Fiscal Estimate:

Over the last 3 years, on average 17 Local Units of Government (13 SQGs & 4 LQGs) generated hazardous waste at a level which required them to submit an annual report. Of those 17, on average 3 (2 SQGs & 1LQG) recycled or reused all of their wastes, so they were not required to pay the base fee (based on the previous statutory language).

Number of Previous Payers SQG = 11 LQG = 3	Base Fee Increase SQG = \$140 LQG = \$260	Cost Increase SQG = \$1,540 LQG = \$780 Total = \$2,320
Number of New Payers SQG = 2 LQG = 1	New Fee SQG = \$350 LQG = \$470	Costs to New Payers SQG = \$700 LQG = \$470 Total = \$1,170

Total Additional Costs for Local Governments = \$3,490
