Plain language analysis:

The department proposes to update, correct or remove outdated rule provisions and cross-references relating to caregiver background checks, community-based residential facilities, licensed adult family homes, hospitals, rural medical centers, the cancer and chronic disease drug repository program and laboratory certification as follows:

Caregiver Background Checks

- Chapter DHS 12, Appendix A, is a list of Wisconsin crimes and other offenses that the legislature under s. 50.065, Stats., determined either require rehabilitation review approval before a person may work as a caregiver, reside as a non-client resident at or contract with an entity, or that act to permanently bar a person from receiving approval to be a foster parent. Over the years, the legislature has revised the crimes and offenses listed in s. 50.065, Stats., making Appendix A incomplete and outdated. To ensure that the list of crimes and offenses now listed by the department in Appendix A is available to the public in an accurate and timely manner, the department proposes to repeal Appendix A and publish the list of crimes and offenses affecting caregiver eligibility on the department’s website at dhs.wisconsin.gov. The department also proposes to update the list of entities, as defined under s. 50.065, Stats., which are subject to the caregiver background law, clarify rule provisions and correct a cross reference.

Community-Based Residential Facilities

- The department proposes to amend ch. DHS 83 to clarify and correct certain provisions in the rule relating to health monitoring, administrator training, resident assessment, doors and construction type, make other minor changes and to update charts, cross-references and links. Specifically, the department proposes to amend s. DHS 83.38 (1) (g), to permit an advanced practice nurse as defined in s. N 8.02 (1) to complete the annual physical health examination of residents. The department proposes to repeal s. DHS 83.59 (2) (e), which requires 2-way hardware on toilet room doors that swing into a toilet room. The requirement applies only to new construction and facilities over 20 beds. When the department revised ch. DHS 83 in January 2009, the department unintentionally made this a requirement for all CBRFs. The rule should not have been changed because the requirement is not appropriate for non-institutional settings. The department also proposes to update Appendix A, which lists contact information for regional offices of the Division of Quality Assurance, Bureau of Assisted Living.

Licensed Adult Family Homes

- Section DHS 88.06 (1) (a) 4. and (4) currently requires an adult family home to provide information and referral of a prospective resident to the aging and disability resource center. These requirements were repealed under 2007 Wisconsin Act 20. 2007 Wisconsin Act 20 repealed s. 50.033 (2r), (2s) and (2t), Stats., making the provisions in s. DHS 88.06 (1) (a) 4. and (4) no longer valid. The department proposes to remove the information and referral requirements from ch. DHS 88. Section DHS 88.10 (5) (b) relating to resident grievance procedures contains an incorrect cross-reference concerning patient storage space. The department proposes to correct the cross-reference and reference the grievance resolution procedures in ch. DHS 94. The department also proposes to update Appendix A which lists contact information for the regional offices of the Division of Quality Assurance, Bureau of Assisted Living.

Hospitals

- Section DHS 124.14 (3) (a) 16., relating to anatomical gifts contains a cross-reference to s. DHS 124.05 (3) (i) 1., which was repealed in a recent revision of ch. DHS 124. The department proposes to correct the cross reference to refer to the patient's health agent as defined in s. 157.06 (2) (a), Stats. The department also proposes to repeal the outdated standard in Appendix A, Food and Nutrition Board, National Academy of Sciences, Recommended Daily Dietary Allowances, revised in 1980, and amend the reference to the standard in s. DHS 124.16 (5) (c). The department does not intend to adopt a replacement standard. Nutritional needs of patients should be met in accordance with physicians' orders and based on current recognized dietary standards.

Rural Medical Centers

- Section DHS 127.02 (2) defines an ambulatory surgery center to have the meaning given in s. 49.45 (6r) (a) 1., Stats. 1997 Wisconsin Act 252 repealed s. 49.45 (6r), Stats., making the definition no longer valid. The department proposes to amend the definition by adopting the federal definition given under 42 CFR 416.2, which defines an ambulatory surgical center (ASC) to mean any distinct entity that operates exclusively for the purpose of providing surgical services to patients not requiring hospitalization, has an agreement with the Centers of Medicare and Medicaid Services (CMS) to participate in

Medicare as an ASC, and meets the conditions set forth in subparts B and C. Subparts B and C of 42 CFR 416.2 are the general conditions, requirements and specific conditions for coverage for ambulatory surgical services.

Cancer and Chronic Disease Drug Repository Program

- 2009 Wisconsin Act 142, effective March 18, 2010, removes certain barriers to donating prescription drug samples and expands the drug repository program to allow individuals to donate unused prescription medications that are in the original packaging, not just drugs to treat cancer and other chronic diseases as previously specified. The department intends to amend ch. DHS 148 to reflect these changes.

Laboratory Certification

- The department proposes to repeal ch. DHS 165. The department regulates laboratories testing human specimens under Agreement with the federal department of health and human services for compliance with 42 CFR 493. Under s. 1864 (a) of the Social Security Act, states having a Section 1864 Agreement with the Secretary of the department of health and human services are obligated to perform inspections or laboratories, and other related activities, to determine compliance with the requirements of the Clinical Laboratory Improvement Amendments of 1988 (CLIA) whether or not the laboratories also participate in Medicare. Federal regulations 42 CFR 493 sets forth the conditions that all laboratories must meet to be certified to perform testing on human specimens under the CLIA.
