Analysis Prepared by the Department of Natural Resources

Statutory authority

Sections 29.014(1) and 29.041, Stats., have been interpreted as giving the department the authority to make changes to fishing regulations on inland, outlying, and boundary waters of Wisconsin.

Plain language analysis of the proposed rule

The proposed rule would make modifications to portions of chs. NR 20 and 23 pertaining to trolling fishing regulations on inland and boundary waters of Wisconsin.

This rule would allow some form of trolling on all inland waters in Wisconsin, which would simplify current regulations and reduce confusion between trolling and position fishing. Trolling means fishing by trailing any lure, bait, or similar device that may be used to attract or catch fish from a boat propelled by a means other than drifting or rowing. Drifting or “row trolling” is allowed in all waters statewide. Position fishing means fishing from a boat in a manner where the fishing line extends vertically into the water while the boat is maneuvered by the use of a motor. Position fishing could be a musky angler fishing with a sucker as bait while maneuvering the boat, but the fishing line would have to remain vertical. If it is trailed out behind the boat or fished under a bobber, then a significant part of the fishing line is no longer vertical in the water and the person is then motor trolling, which is prohibited on many waters. Many anglers want the option to trail a fishing line behind their boat while maneuvering the boat and not need to worry whether the line is staying completely vertical in the water. Allowing trolling in all inland waters may remove the need to define position fishing and allow anglers to trail bait behind their boats as well as do other forms of trolling, such as using planar boards that extend fishing lines far from the boat while motoring through the water.

Allowing trolling statewide would:

- 1) simplify regulations by eliminating confusion about where trolling is or is not allowed;
- 2) allow moving boats to trail behind suckers or other minnows while occupants are casting on all waters;
- 3) eliminate the need for disabled anglers to have to apply for trolling permits; and
- 4) provide additional fishing opportunities for anglers who may have difficulty fishing by other methods.

The rule allows fishing by the method of trolling on all inland waters with one hook, bait, or lure and – depending on location – up to three hooks, baits, or lures. Trolling means trailing a lure or bait from a boat propelled by a means other than drifting or rowing, and Section 1 will also include means other than pedaling or paddling.

Section 2 (amending s. NR 20.06(1)) allows trolling with one hook, bait, or lure statewide and applies county-wide to Iron, Menominee, Milwaukee, Ozaukee, and Vilas counties. It also applies county-wide to Fond du Lac and Waushara counties, with the exception of Lake Winnebago system waters in those counties that allow 3 hooks, baits, or lures when trolling.

Exceptions to the one hook, bait, or lure rule are listed in Section 3 (creating s. NR 20.15(4), covering 55 counties) and Sections 16, 20, 25, 32, 33, 35, 37, 48, 50, 55, 60, and 61 (amendments throughout s. NR 20.20 and NR 23). All other sections repeal existing rule language for counties that will now be governed by Section 3, which allows trolling with up to three hooks, baits, or lures per person. Door, Florence, Jackson, Lincoln, Marathon, Marquette, Oneida, Sawyer, Sheboygan, and Washington counties will allow trolling with 3 hooks, baits, or lures on waters where it is currently allowed and trolling with 1 hook, bait, or lure on all other waters in the county. The number of hooks, baits, or lures allowed on Lake Michigan and Green Bay tributaries will match the number allowed in their respective counties. All Lake Winnebago system waters will allow trolling with up to 3 hooks, baits, or lures. There is no change to trolling rules on outlying waters and WI-MN, WI-IA, and WI-MI boundary waters, which already allow trolling with up to three hooks, baits, or lures except on WI-MI boundary waters of Vilas County which will allow trolling with only 1 hook, bait, or lure.

Summary of and comparison with existing or proposed federal statutes and regulations

Authority to promulgate fishing regulations is granted to states. None of the proposed changes violate or conflict with federal regulations.

Comparison with rules in adjacent states

Motor trolling has been allowed for decades in Michigan (3 lines) and Minnesota (1 line). Trolling is allowed in Illinois provided the angler has not more than three poles and lines with not more than two hooks or lures on each. Iowa anglers may not use more than two lines or more than two hooks on each line when still fishing or trolling; if trolling and bait casting, one cannot use more than two trolling spoons or artificial baits on one line. A third line may be used when possessing a valid third line fishing permit.

Summary of factual data and analytical methodologies

Restrictions on motor trolling are inconsistently applied across the inland waters of Wisconsin. There is no biological justification for this inconsistency from lake-to-lake or county-to-county; angling success (catch rates) and harvest of muskellunge, walleye, or northern pike do not differ between casting and trolling. Also, a variety of interpretations still exist among anglers regarding the differences between “motor trolling” and “position fishing.” For example, the practice of drifting with live bait and occasionally repositioning the boat, usually with an electric motor (often while also casting and retrieving an artificial lure), is specifically prohibited, yet many anglers believe this method is consistent with the definition of “position fishing.” There are two primary concerns related to motor trolling: first, that trolling will result in more conflicts among anglers on small lakes, and second, that trolling negatively impacts the size-structure of fish populations (mainly muskellunge). However, the department has had no reports of user conflicts from the considerable number of waters already open to motor trolling, even though most are less than 400 acres in size.

In 2012, attendees of the statewide Spring Fish and Wildlife Hearings voted in favor of a Conservation Congress advisory question to allow motor trolling statewide, with 1,928 people in favor and 1,576 people opposed. In a 2010-11 statewide mail survey, 64% of musky anglers reported doing some amount of trolling for muskellunge in Wisconsin during 2010, and 91% indicated they would do some amount of trolling if it were legalized statewide.

A 2013 rule (FH-18-12) proposed by the department originally included a trolling proposal that would have allowed trolling on all inland waters statewide with up to three hooks, baits, or lures per angler (three is the maximum number of hooks, baits, or lures that a person may use while hook and line fishing). After public hearings in each county and discussions with Wisconsin Conservation Congress delegates, the rule was modified to allow trolling on all inland waters statewide with one hook, bait, or lure per angler, and allowing trolling with up to three hooks, baits, or lures in most counties of the State and some individual waters. However, after submitting the rule to the Governor’s Office of Regulatory Compliance, it requested that the department remove all trolling elements from the rule and obtain additional public input on a trolling proposal.

Analysis and supporting documents used to determine effect on small business or in preparation of an economic impact analysis

It is not expected that there will be any economic impact directly related to these rule changes. The proposed rule does not apply directly to businesses, but to sport anglers. The department will conduct an economic impact analysis to determine if any individuals, businesses, local governments, or other entities expect to be affected economically.

Effects on small business

The rule is not expected to have an effect on small businesses. The proposed rule does not impose any compliance or reporting requirements on small businesses nor are any design or operational standards contained in the rule.

The Small Business Regulatory Coordinator may be contacted at SmallBusiness@dnr.state.wi.us, or by calling (608) 266-1959.

Environmental Analysis

The Department has made a preliminary determination that adoption of the proposed rules would not involve significant adverse environmental effects and would not need an environmental analysis under ch. NR 150, Wis. Adm. Code. However, based on comments received, an environmental analysis may be prepared before proceeding. This analysis would summarize the Department’s consideration of the impacts of the proposal and any reasonable alternatives.

Fiscal Estimate Summary

It is not expected that there will be any economic impact directly related to these rule changes. The proposed rule does not apply directly to businesses, but to sport anglers. The rule is not expected to have an effect on small businesses. The proposed rule does not impose any compliance or reporting requirements on small businesses nor are any design or operational standards contained in the rule.
