14. Summary of Rule's Economic and Fiscal Impact on Specific E Governmental Units and the State's Economy as a Whole (I Incurred) State: The proposed changes contained in this rule do not have changes are technical in nature. The changes contained in this conforming department rules with recent statutory changes.	Include Implementation and Compliance Costs Expected to be we any economic or fiscal impact to the state because the

## Local: No local economic or fiscal impact.

15. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule

Chapter PI 40 of the Wisconsin Administrative Code contains the rules governing the Early College Credit Program (ECCP), which permits students in grades 9-12 at either a public or private school to attend and earn credit at an institution of higher education in Wisconsin. An eligible student may participate in ECCP at either no cost or a reduced cost, depending on whether the student earns postsecondary credit, high school credit, or both, and whether the student's school district or private school offers a comparable course. Since the rules were promulgated, 2021 Wisconsin Act 217 added references to independent charter school governing boards throughout the ECCP statute, thus permitting students enrolled in independent charter schools to participate in ECCP in the same manner that private and

## ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

public-school students may participate. As a result, the department proposes a technical change to ch. PI 40 to align it with changes in statute and incorporate references to independent charter school governing boards throughout the rule. Without a rule change, the department will have rules that are not fully aligned with the statutes.

16. Long-Range Implications of Implementing the Rule

This rule change is designed to align ch. PI 40 of the Wisconsin Administrative Code with recent changes in statute. Rule and statute will be consistent.

17. Compare With Approaches Being Used by Federal Government N/A

18. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)
Illinois (23 Illinois Administrative Code 1009): The Illinois Department of Education provides for a Dual Credit program, which permits high school students to enroll in a college course for both high school and college credit. The state also permits districts to enter into joint agreements with community college districts and other school districts to provide career education or advanced vocational training of 11th and 12th grade students. The rules permit appropriate measures to assess and grant eligibility for dual credit to students and specify that the determination of whether the course is offered for concurrent high school and college credit is made at the secondary level, according to the school's policies and district practices.

Iowa (Iowa Administrative Code Chapter 281-22): The Iowa Department of Education created an umbrella program called Senior Year Plus (SYP) that encompasses Concurrent Enrollment, Postsecondary Enrollment Options Program (PSEO), Advanced Placement (AP), Career Academies, Regional Academies, and Project Lead the Way. The SYP program was implemented to provide increased and more equal access to college credit and AP courses. SYP programs offer students an opportunity to enroll in college coursework and, in most cases, receive both high school and college credit simultaneously. The rules establish the criteria pupils and eligible postsecondary institutions must meet in order to participate in an SYP program.

Michigan (Michigan Administrative Code Section R 388.151-388.155): The Michigan Department of Education provides for payment from a school district's foundation grant for enrollment of certain eligible high school students in postsecondary courses of education under its Postsecondary Enrollment Options program. The rules and underlying statutes establish eligibility criteria for students, institutions, and courses; requires eligible charges (tuition, mandatory course or material fees, and registration fees) to be billed to a school district; establishes enrollment and credit requirements; requires school districts to provide counseling and information to eligible students and their parents; and requires intermediate school districts to report to the Department of Education.

Minnesota (Minnesota Statutes section 124D.09): The Minnesota Department of Education permits 10th, 11th, and 12th grade students to earn college credit while still in high school through enrollment in and successful completion of college-level courses through its Postsecondary Enrollment Options program. The statutes provide that college-level courses may be provided in a high school (referred to as concurrent enrollment, or "college in the high school"), a postsecondary institution, or another location according to an agreement between a public school board and the governing body of an eligible public postsecondary system or an eligible private postsecondary institution.
