Analysis of Rule

1. Statutes Interpreted

Statutes Interpreted: ss. 101.02 (1), 101.02 (15) (j), 101.09, 101.63, 101.654, 101.82, 101.951, 101.985, 145.02, and 145.17

2. Statutory Authority

Statutes Interpreted: ss. 101.02 (1), 101.02 (15) (j), 101.09, 101.63, 101.654, 101.82, 101.951, 101.985, 145.02, and 145.17

3. Related Statute or Rule

None known.

4. Explanation of Agency Authority

Chapter 101, Stats., authorizes the Department of Commerce to adopt reasonable and proper rules relative to the exercise of its powers and authorities, including the issuance and renewal of various credentials to businesses and individuals related to building construction and petroleum storage tanks. Chapter 145, Stats., grants the Department authority to promulgate rules governing plumbers and automatic fire sprinkler system installers.

5. Summary of Proposed Rules

For the most part the proposed rule revisions are non-substantive in nature; correcting or providing consistent format, eliminating irrelevant dates, updating referenced national standards to current editions; clarifying registration obligations; and revising terminology to reflect statutory changes (2009 Wisconsin Act 291).

There are three substantive revisions:

- Establishing qualifying provisions for individuals applying to take the certification exam for automatic sprinkler fire sprinkler system testers. Applicants would be required to complete either level II NICET certification in the inspection and testing of water-based automatic fire sprinkler systems, or 1,500 hours of experience over 18 months as tester learner which would be a newly created credential.
- Establishing 12 hours of continuing education obligations for automatic fire sprinkler system testers for the renewal of the certifications on and after January 1, 2014.
- Reducing the continuing education obligations for utility contractor license renewal from 12 hours to 6 hours.

6. Summary of, and Comparison with, Existing or Proposed Federal Regulations

Relative to the substantive provisions of the proposed rules revisions, the federal government does not license plumbers or individuals who test automatic fire sprinkler systems.

7. Comparison with Rules in Adjacent States

An Internet based search relative to the proposed substantive revisions concerning automatic fire sprinkler system testers and utility contractors did not find any credentialing provisions for these specific categories in Illinois, Iowa, Michigan or Minnesota, although the states do have licensing provisions for automatic fire sprinkler systems and plumbing.

8. Summary of Factual Data and Analytical Methodologies

There are currently 101 individuals certified by the Department as automatic fire sprinkler system testers and 427 individuals licensed as utility contractors. The proposed revisions relating to automatic fire sprinkler testers and utility contractors were developed after evaluating their respective scope of activities performed under their credentials.

9. Effect on Small Business including an Analysis and Supporting Documents used to Determine Effect on Small Business or in Preparation of Economic Impact Report

The proposed revisions relating to the automatic fire sprinkler testers were recommended by the Automatic Fire Sprinkler Contractor and Journeymen Licensing Council. Council members are responsible for bringing forth the concerns that their respective organizations may have with the requirements including economic impacts.

The department also offers an e-mail subscription service to anyone who is interested in rule development and/or council activities. The service provides e-mail notification of council meetings, meeting agendas and council meeting progress reports.

E-mail notifications for revisions under chapter Comm 5 typically are sent to the subscription service subscribers who are affected by the changes. Notifications will be sent to subscribers who are interested in manufactured homes, welding, electrical, automatic fire sprinkler systems, plumbing and elevators. E-mail notifications would be sent to approximately 6,000 subscribers.

The department believes the rules will not increase the effect on small businesses from what the current rules impose on them. An economic impact report is not required pursuant to section 227.137, Stats.
