The customer shall be appraised of this right upon application for service.

(7) Notwithstanding any other provision of this section, a utility may not disconnect service to a residential customer if disconnection will aggravate an existent medical emergency of the customer, a member of his family or other permanent resident of the premises where service is rendered and if the customer conforms to the pro-

- 3. A statement that the customer should communicate immediately upon receipt of the notice with the utility's designated office, listing a telephone number, if he disputes the notice of delinquent account, if he wishes to negotiate a deferred payment agreement as an alternative to disconnection, if any resident is seriously ill, or if there are other extenuating circumstances.

- (b) If the commission decides to conduct a formal hearing on the dispute, the customer shall be required to pay 50% of the bill in dispute to the utility or post bond for that amount on or before the date of hearing. Failure to pay this amount or post bond before hearing will constitute a waiver.

- (d) Any such hearing shall be held not less than 10 days following a notice of hearing and a decision thereon shall be rendered following the conclusion of the hearing.
- (4) Utility service shall not be disconnected because of any disputed matter while the disputed matter is being pursued in accordance with the provisions of this section. In no way does this relieve the customer from the obligation of paying charges which are not disputed.

The utility shall make such adjustments and such changes to all customers' appliances that are connected to an interior piping system at the time of the change as may be necessary in order that the appliance may operate as efficiently and give as good service as was possible before the change. The change in customer's equipment should be made with the greatest possible economy to the customer, and final settlement made at the time of the change. A satisfactory settlement would be payment by the utility to the customer of the remaining value of the customer's equipment and the cost of removing the old and installing in the same position substantially equal equipment which replaces it.
- (3) Each utility shall adopt and file with this commission a policy for periodic inspection of customer's appliances. This period shall not be greater than 5 years. The filed rule need not include the inspection and adjustment of special industrial equipment, which should be

- (3) Every reasonable effort shall be made to measure at one meter location all gas quantities necessary for billing the customer.
- (4) All gas customers of the same type, pressure, and/or volume classification shall have their gas metered with instruments having like characteristics and at the same pressure base, except that the commission may approve the use of instruments of different types if their use does not result in unreasonable discrimination.
- (5) Any regulators or equipment used to provide service in accordance with commission or filed utility rules and rates shall be commercially acceptable devices owned and maintained by the utility.
- (6) A temperature-compensating meter shall be used whenever a gas meter is subject to the elements of the weather or wide variations in temperature.
