RULES in FINAL DRAFT FORM

| Rule: _ | Chs. Ir | nd 50-64 |
|----------|---------|--|
| Relating | to: | Building & Heating, Ventilating & Air Conditioning |
| 9 | | Code - Class of Construction |
| Clearing | hou | se Rule No.: 83-69 |

Administrative rules to repeal ss. Ind 51.03 (1) (h), (i), (2) (i), (j), 51.045 (1) (f); to renumber s. Ind 57.05 (2) (b) 7.; to amend ss. Ind Table 51.03-A, 51.03 (3) (d), 51.03 (6) (e), Table 51.07 Footnote 3, 54.03 (1) (d) (intro.), 54.03 (1) (d) 5., 54.03 (1) (d) 6., 57.05 (2) (b) (intro.), 57.05 (2) (b) 6.; to repeal and recreate s. Ind 51.045 Table 2 Line 12; to create ss. Ind 51.02 (4) (c), 51.03 (4) (i), 51.03 (7) (g), 51.042 (8), 51.045 (1) (r), 51.07 (6), 54.03 (1) (d) 7., 57.02 (3), 57.05 (2) (b) 7., relating to class of construction, fire-resistive materials standards and interior finishes of public buildings and places of employment.

ANALYSIS OF RULES

The proposal updates and expands various portions of the Building and Heating, Ventilating and Air Conditioning Code. The proposal includes provisions to address the in-filling of fenestration openings in existing buildings for energy conservation; correction to the class of construction table; deletion of interior finish rules from the class of construction requirements; bay and oriel construction in heavy timber and wood frame protected buildings; update the fire-resistivity rules for hollow masonry walls; address the application of interior finish materials; require pressure treated or inherently decayresistant wood for rescue platform construction; and mandate fire department access roadways for residential occupancies.

The proposed rules were developed in conjunction with the Project Committee for Classes of Construction and the Building Code Advisory Review Board. The following is a listing of the members of the project committee and the Review Board:

Project Committee for Classes of Construction

- William G. Bakken, City of Madison
- Peter Billing, National Forest Products Association
- Robert E. Franklin, Metropolitan Builders Association of Greater Milwaukee
- Wilbert King, Wisconsin Society of Architects/AIA
- James Knothe, Wisconsin Society of Architects/AIA
- Henry Kominek, American Iron and Steel Institute
- Patrick Murphy, Wisconsin Builders Association
- Dale Strub, Wisconsin Society of Professional Engineers
- Richard Walter, Wisconsin Concrete Product Association

Building Code Advisory Review Board

- Sharyl Bisgard, League of Women Voters
- Ronald W. Chiapete, Wisconsin State Fire Chiefs Association
- Victor Halloran, Wisconsin Society of Architects/AIA
- Lee C. Jensen, City of Milwaukee
- James E. Knothe, Wisconsin Society of Professional Engineers
- Marshall Kuhnly, Wisconsin State AFL-CIO
- Michael G. Laskis, State Bar of Wisconsin
- Thomas Lorenz, Master Builders Association of Wisconsin, Inc.
- George J. Mark, Wisconsin Builders Association
- Donald Roth, League of Wisconsin Municipalities
- David J. Schield, Wisconsin Association of Manufacturers and Commerce
- Stephen D. Schlough, Wisconsin Department of Health and Social Services
- Richard C. Schumacher, Wisconsin Chapter, Associated General Contractors of America, Inc.
- William Shea, Building Owners and Manufacturers Association/Income Property Owners Association
- Jahn Tinglum, Wisconsin Department of Public Instruction
- Fred Wegener, Wisconsin Department of Administration, Division of State Facilities Management
- Larry J. Wills, Wisconsin Chapter, Society of Fire Protection Engineers

Pursuant to the authority vested in the state of Wisconsin's Department of Industry, Labor and Human Relations by ss. 101.02 (1) and 101.02 (15) (h) to (j), Stats., the department hereby repeals, renumbers, amends, repeals and recreates and creates rules interpreting ss. 101.02 (15) (h) to (j) Stats., as follows:

SECTION 1. Ind 51.02 (4) (c) is created to read:

Ind 51.02 (4) (c) 1. Except as provided in subd. 2., fenestration in-fill panels in the exterior walls of existing buildings of types 1, 2, 3, 5A and 5B construction meeting the percentage of openings requirements of Table 51.03-B shall be of noncombustible construction.

- 2. a. The studding and structural framework may be of fire retardant treated wood.
- b. The interior finish of the in-fill panel may be of combustible materials providing the materials comply with the provisions of s. Ind 51.07.
- c. Foam plastic insulation complying with the provisions of s. Ind 51.06 may be used in the construction of the in-fill panels provided the foam plastic is protected on both sides by an approved thermal barrier as specified in s. Ind 51.06 (4).
- 3. In-fill panels located in exterior walls required to have a fire resistive rating need not be constructed to provide the hourly rating provided the panels satisfy the requirements of this section.
- 4. The exterior finish of the in-fill panel shall comply with the requirements of Table 51.03-A for the class of construction of the building in which the panel is located except that the exterior finish of in-fill panels located in buildings of types 5A or 5B construction need not be of masonry.

SECTION 2. Table 51.03-A is amended to read:

NC - Noncombustible NP - Not Permitted

H.T. - Heavy Timber

P/L - Property Line

- a See occupancy sections of the code for other basic requirements and more restrictive limitations.
- b Roof covering same as for main building.
- c Walls of solid wood 4 inches in thickness are acceptable as equal to one hour fire-resistive rating.
- d Pire-resistive requirements also apply for those bracing members required for gravity loading-
- e Refer to Table 51.03-B for allowable areas for windows and other openings in exterior walls.
- f For exceptions refer to s. Ind 51.02.
- g Setbacks and distances to P/L or other buildings on same property do not apply to P/L along streets.
- h Approved fire-retardant treated wood will be accepted in lieu of 3/4-hour fire-resistive ratings.
- f) For openings in partitions and interior bearing walls, see s. Ind 51.02.
 k Hourly ratings specified as for fire exposure from the inside of the building only.

KEY EXAMPLE TO READING CHART

- 0 = 0 iNo Hour Rating)
- 1 = Combustible or Non-combustible 1 Hour Parting

- SECTION 3. Ind 51.03 (1) (h) and (i), (2) (i) and (j) are repealed.
- SECTION 4. Ind 51.03 (3) (d) is amended to read:
- Ind 51.03 (3) (d) Bays, oriels and similar exterior projections from the walls shall be constructed of material with fire-resistive ratings not less than that specified as required for exterior walls in Table 51.03-A.
- SECTION 5. Ind 51.03 (4) (i) is created to read:
- Ind 51.03 (4) (i) Bays, oriels, and similar exterior projections from the walls shall be constructed of material with fire-resistive ratings as required for exterior walls.
- SECTION 6. Ind 51.03 (6) (e) is amended to read:
- Ind 51.03 (6) (e) Bays, oriels and similar exterior projections from the walls shall be constructed of material with fire-resistive ratings not less than that specified as required for exterior walls in Table 51.03-A.
- SECTION 7. Ind 51.03 (7) (g) is created to read:
- Ind 51.03 (7) (g) Bays, oriels and similar exterior projections from the walls shall be constructed of material with fire-resistive ratings as required for exterior walls.
- SECTION 8. Ind 51.042 (8) is created to read:
- Ind 51.042 (8) Structural elements which support building components or assemblies required to have a fire-resistive rating shall be protected to afford at least the same fire-resistive rating of the component or assembly supported.
- SECTION 9. Ind 51.045 Table 2, Line 12 is repealed and recreated to read:

TYPICAL EXAMPLES OF FIRE RESISTIVE STRUCTURAL COMPONENTS, TABLE 2 (CON'T)

| ·3 .7 | POX | STPUNTURAL | | | | | MINIMUM REQU | IERKEKUS | |

- SECTION 10. Ind 51.045 (1) (f) is repealed.
- SECTION 11. Ind 51.045 (1) (r) is created to read:
- Ind 51.045 (1) (r) The specified hourly rating may be increased by 2 hours if the cores are filled with loose, dry expanded slag, water repellent vermiculite or burned clay or shale.
- SECTION 12. Table 51.07 Footnote 3 is amended to read:
- Requirements for rooms or enclosed spaces are based upon the spaces being separated from exit access corridors and exits by partitions extending from the floor to the ceiling. Where partitions do not satisfy this criteria, the room or space is considered part of the exit access or the exit. Where the room or enclosed space is not separated from the exit access corridor, the room or space is considered part of the exit access or the exit.
- SECTION 13. Ind 51.07 (6) is created to read:
- Ind 51.07 (6) APPLICATION OF INTERIOR FINISH. (a) Attachment. Interior finish materials shall be applied or otherwise fastened in such a manner that they will not readily become detached when subjected to room temperatures of 200 degrees F. or less for 30 minutes, or otherwise become loose through changes in the setting medium from the effects of time or conditions or occupancy.
- (b) Application to Structural Elements. 1. Interior finish materials applied to walls, ceilings or structural elements of a building or structure which are required to be of fire-resistive rated or noncombustible construction shall be applied directly against the exposed surface of such structural elements or to furring strips attached to such surfaces.
- 2. Where furring strips are used, all concealed spaces shall be firestopped into areas not greater than 10 square feet in area or 8 feet in any dimension.
- (c) <u>Furred construction</u>. Where walls, ceilings or other structural elements are required to be of fire-resistive rated or noncombustible construction, and the interior finish is set out or dropped distances greater than 1-3/4 inches from the surface of the elements, only material of which both faces qualify as Class A shall be used, unless the finish material is protected on both sides by an approved automatic fire suppression system or is attached to a noncombustible backing as specified in par. (e) or to furring strips applied directly to such backing as specified in par. (b).
- (d) Class B and C finish materials. Interior finish materials, other than Class A materials which are less than 1/4 inch in thickness, shall be applied directly against a noncombustible backing or a backing of fire-retardant treated wood unless the tests under which such material has been classified were made with the materials suspended from the noncombustible backing.
- (e) <u>Backing material</u>. 1. Backing for interior finish materials shall be a continuous surface with permanently tight joints, equal in area to the area of the finish, and extending completely behind such finish in all directions.

- 2. Backing shall be of noncombustible or fire retardant treated wood materials.
- 3. When the backing does not constitute an integral part of the structural elements or system, it shall be attached directly to the structural elements or to furring strips as specified in par. (b) or may be suspended from the structural members at any distance provided concealed spaces are firestopped as specified in s. Ind 53.63 (1).
- SECTION 14. Ind 54.03 (1) (d) (intro) is amended to read:

Ind 54.03 (1) (d) Exception. A rescue platform (exterior balcony) of combustible construction may be used as a required second exit for 2-story buildings of type 7 and 8 construction, provided the following conditions are satisfied:

SECTION 15. Ind 54.03 (1) (d) 5. is amended to read:

Ind 54.03 (1) (d) 5. Railings are provided in accordance with the provisions of s. Ind 51.162; and

SECTION 16. Ind 54.03 (1) (d) 6. is amended to read:

Ind 54.03 (1) (d) 6. Platforms having solid floors are provided with a roof equal in area to that of the platform.; and

SECTION 17. Ind 54.03 (1) (d) 7. is created to read:

Ind 54.03 (1) (d) 7. All wood used in the construction of the rescue platform shall be pressure treated wood satisfying the requirements of the applicable standards specified in s. Ind 51.27 (6a) unless the wood is inherently resistant to decay.

SECTION 18. Ind 57.02 (3) is created to read:

Ind 57.02 (3) ACCESS ROADWAYS FOR FIRE APPARATUS. (a) Buildings shall be accessible to fire department apparatus by means of streets as specified in s. Ind 51.01 (124) or access roadways. Access roadways shall be at least 20 feet in width, be capable of supporting the imposed loads of the fire apparatus and have a minimum of 13 feet 6 inches in vertical clearance.

- 1. For buildings 3 stories or less in height, the street or access roadway shall be located within 150 feet of all portions of the exterior walls of the first story.
- 2. For buildings more than 3 stories in height, the street or access road-way shall extend along at least one entire side of the building with the road edge closest to the building at least 10 feet but not more than 50 feet from the building.
- (b) The required streets and access roadways shall be kept free at all times of all obstructions, including parked vehicles and snow.

SECTION 19. Ind 57.05 (2) (b) (intro) is amended to read:

Ind 57.05 (2) (b) A rescue platform (exterior balcony) of combustible construction may be used as a required second exit for $\frac{2}{3}$ -story buildings of type 5 through type $\frac{1}{3}$ construction or 2-story buildings of type 8 construction, provided the following conditions are satisfied:

SECTION 20. Ind 57.05 (2) (b) 6. is amended to read:

Ind 57.05 (2) (b) 6. Platforms having solid floors are provided with a roof equal in area to that of the platform; and

SECTION 21. Ind 57.05 (2) (b) 7. is renumbered Ind 57.05 (2) (b) 8.

SECTION 22. Ind 57.05 (2) (b) 7. is created to read:

Ind 57.05 (2) (b) 7. All wood used in the construction of the rescue platform shall be pressure treated wood satisfying the requirements of the applicable standards specified in s. Ind 51.27 (6a) unless the wood is inherently resistant to decay; and

EFFECTIVE DATE

Pursuant to s. 227.026 (1), (intro), Stats., these rules shall take effect on the first day of the month following publication in the Wisconsin Administrative Register.
