ANALYSIS OF RULES

The Division of Safety and Buildings, within the Department of Industry, Labor and Human Relations, is responsible for administering and enforcing a variety of regulatory programs concerning public safety and building standards. The programs of the division are funded from revenue collected through user fees which are specified in chapter Ind 69 of the Wisconsin Administrative Code. Provisions of chapters 101 and 145 of the Statutes grant the department the authority to fix and collect fees that as closely as possible will equal the cost of providing its services. The fees of several of the programs are being amended in order to offset the costs of providing these services. Proposed rule changes in the fees include:

- An increase of the fees for the review of plumbing plans for private sewage systems;
- An increase of the fees for the review of plumbing plans for mobile home parks;
- Adjustments in the fees for the review of petitions for variances;
- The establishment of a fee for the review of revisions to previously examined plumbing plans;
- The establishment of a fee for the processing of projects for which the installation of plumbing has commenced without department approval;
- An adjustment of the minimum fees for the examination and approval of commercial building plans;
- A decrease of the fee for a permit to start the construction of commercial buildings;

- An increase of the fee for the review of revisions to previously examined building plans for commercial buildings;
- An increase of the inspection fees associated with alterations of commercial buildings;
- The establishment of a fee for the review of petitions for modification on a priority basis;
- The establishment of a fee for providing mailing lists upon request;
- An adjustment in the fee schedule for annual safety inspections of mines, pits and quarry operations; and
- A restructuring and decrease for the fees for coin operated kiddie amusement rides.

Pursuant to s. 145.02 (4), Stats., the proposed rule changes in the fees for the administration and enforcement of the state uniform plumbing code have been reviewed by the Plumber's Council.

The proposed fees for plumbing material approvals which was included in s. Ind 69.23 (5) of the public hearing rule package has been separated out of this package and will be processed as a separate rule submittal for legislative committee review.
